Section 1. Before Start

Section 1.1. What's new in Pro iTrading

New features make Pro iTrading an increasingly approachable application that maximizes usability and efficiency for clients to trade Forex and CFD in the Global market 24 hours a day.

Menu Bar

The new Menu Bar includes additional selections that provide a more central and convenient way to select the many functions available on the trading platform.

Config

This function allows you to select the rows of products and the information columns that you would like to see in the *Quote* panel. It also permits front style and size setting for the information shown in this panel.

Layout

Pro iTrading allows you to select, resize and position the different information panels that are most suitable for your use. You can save your preferred layout settings and load them back the next time you logon on to Pro iTrading.

Confirm Setting

This function gives you the option of whether you would like the system to reconfirm your orders before placing it.

Reply Ticket Setting

This function gives you the option to choose the kind of system reply message you would like to receive.

View

All available information panels can be selected from "View" which is located on the Menu Bar. Each information panel is independent and can be resized or positioned according to your preference.

Windows

This menu provides you with the common manipulation abilities that can be apply to any opened information panels.

Section 1.2. System Requirement

Platform: **Windows**

- Windows 98 SE or above
- 600 MHz Intel Pentium III processor or above
- 128 MB RAM or above (256 MB recommended)
- JAVA virtual machine version 1.4 or above

Section 1.3. Getting Pro iTrading

There is a way to login to the Pro iTrading platform by download software version.

Download version

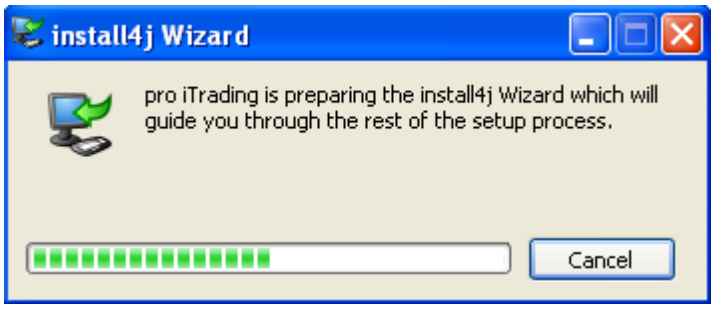
A. Download Pro iTrading for Window
B. Download Pro iTrading for MacOS

⚠ Please follow the link “Forgotten Password?” if your password is lost.
⚠ Download the Java JRE

*Please refer to Section 3 for login details.

Section 1.4. Installation

Locate the downloaded installation package of Pro iTrading and double click on it. This will begin the installation.



install4j Wizard
pro iTrading is preparing the install4j Wizard which will guide you through the rest of the setup process.
Cancel

Figure 1

1. Begin installation automatically after clicking the download link.

Setup - pro iTrading V5 5.0
Welcome to the pro iTrading V5 Setup Wizard
This will install pro iTrading V5 on your computer.
It is recommended that you close all other applications before continuing.
Click Next to continue, or Cancel to exit Setup.

A Progress box tracking the installation process will then appear. A few brief dialogs confirm the final steps of the installation process, and a concluding message should appear with the confirmation **"Installation Completed OK"**

After successful login, user will see the Pro iTrading main page with eight default panels displayed. (1) On the top middle is the Real-time Price Viewer – Quote. (2) On the top left are the Real-time Price Viewer – Advance Quotes. (3) On the bottom left is the Market Order panel – Open Positions. (4) On the top right is the Real-time chart. (5) On the bottom right window is Real-time news panel. (6) The Menu Bar is situated across the top. (7) Status Bar is situated across the bottom of the window. Pro iTrading is designed to be easily used and fast to execute orders. User can watch the real-time price, examine his/her current portfolio and enter new orders almost simultaneously with a touch of a few buttons.

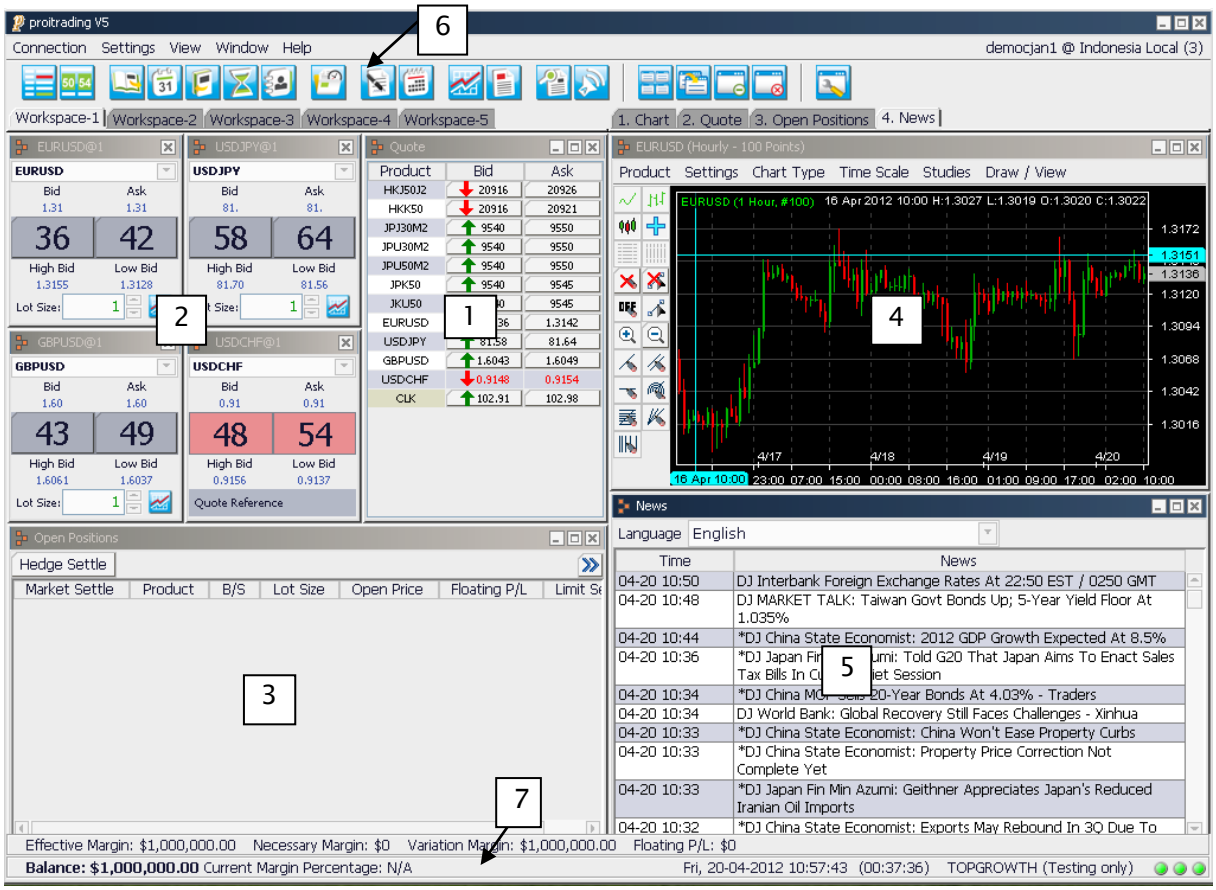

Figure 11

Section 1.1. Real-time Price Viewer

Section 1.1.1. Real-time Quote Panel

The Real-Time Price Viewer panel should be loaded on default. Alternatively it can be found by selecting View → Quote on the Menu Bar.

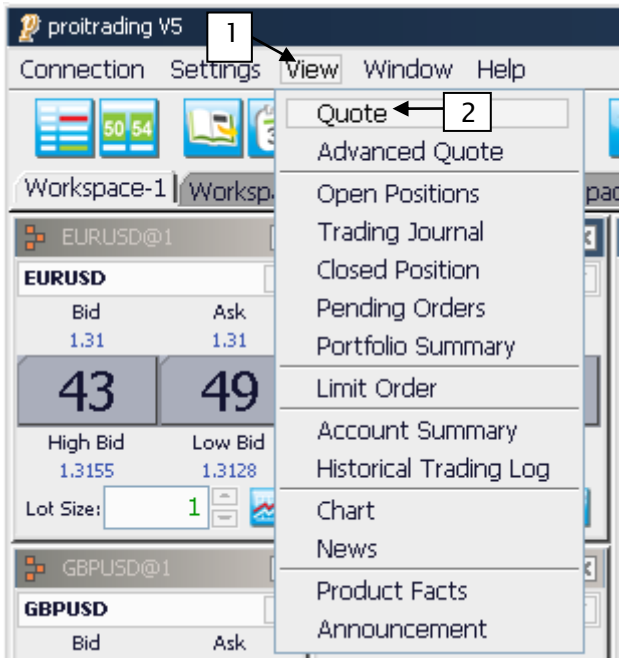

Figure 12

1. Click the “View” tab on the Menu Bar.
2. Click the “Quote” tab to open the Real-Time Price Viewer.

The Real-time Price Viewer provides the user with automatic price information of different products. Momentary RED or GREEN color is used to highlight the change of price level. If the market price of a particular currency rises, its background color will change to green. If the market price of a particular currency falls, its background color will change to red. The Previous Bid, Previous Ask, Highest Bid and Lowest Bid are valuable information for the user’s reference.

The product items displayed on the viewer are all tradable on the system. The user can activate the Market Order by clicking on the Bid or Ask price box.

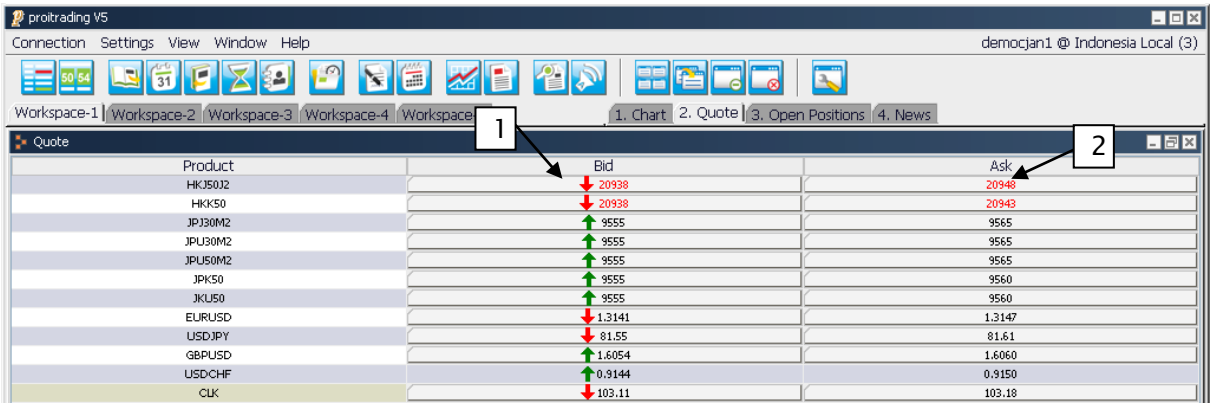

Figure 13

1. Click on the “Bid” price box to open market sell order.
2. Click on the “Ask” price box to open market Buy order.

Product – The name of the product.
BID – The *‘sell’* price. This price is dynamic and will fluctuate tick by tick according to market conditions of that time.
ASK – The *‘buy’* price. This price is dynamic and will fluctuate tick by tick according to market conditions of that time.
Prev Bid – The previous bid price before the last tick / change.
Prev Ask – The previous ask price before the last tick / change.
High Bid – The highest bid price recorded within the current trade day.
Low Bid – The Lowest bid price recorded within the current trade day.
Time – The time of last update applied to the bid or ask quotations.

* Please refer to Section 5 for the details of Market Open.

Section 1.1.2. Real-time Advanced Quote Panel

The Real-Time Advanced Quote Price Viewer panel can be found by selecting View → Advanced Quote on the Menu Bar.

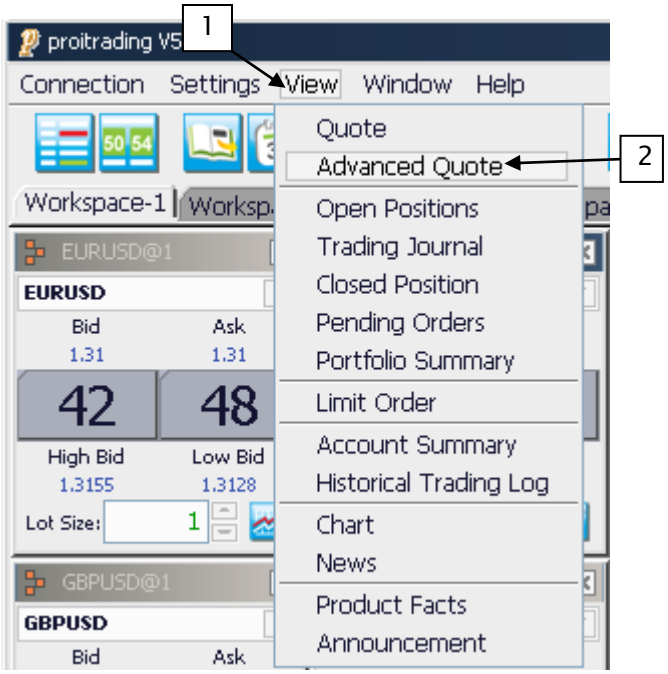

Figure 14

1. Click the “View” tab on the Menu Bar.

2. Click the “Advanced Quote” tab to open the Real-Time Advanced Quote Price Viewer.

Figure 15

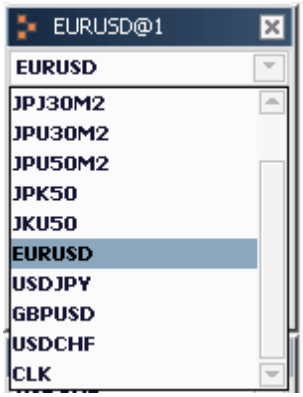

Figure 16

1. Click the pull-down Menu Bar to choose a product.
2. Enter the order size.
3. Click on Bid box or Ask box to make Market sell or buy order respectively.

The Real-time Advanced Quote Price Viewer provides the user with automatic price information of a particular product only. Momentary RED or GREEN color is used to highlight the change of price level. If the market price of a particular currency rises, its background color will change to green. If the market price of a particular currency falls, its background color will change to red.

The product item displayed on the Advanced Quote panel is tradable on the system. The user can activate the Market Order by clicking on the Bid or Ask price box after entering the order size.

Section 1.2. Market Order panel

The user can review any Open Positions on the “Open Positions” panel which is loaded on default. Alternatively this panel can be found by selecting View → Open Positions on the Menu Bar.

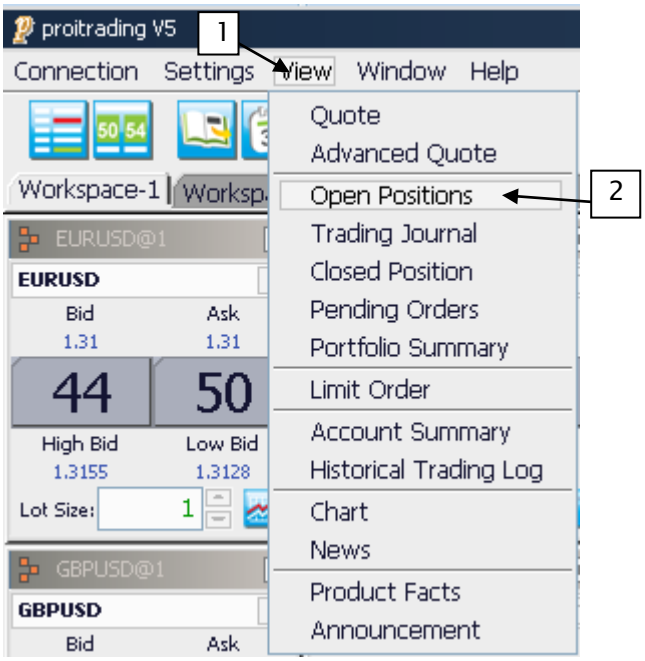

Figure 17

1. Click the "View" tab on the Menu Bar.
2. Click the "Open Positions" tab to review the Open Positions.

In the Open Position panel, details of all open positions, such as floating profit & loss, can be viewed.

Figure 18

1. Click on the "Settle" button to settle an open position. (please refer to Section 6 for the market settle details)
2. Click on the "Add" button to add a limit settle order on a particular outstanding position. (please refer to Section 8 for limit settle details)

3. Click on the arrow button to toggle the table view to detail mode.

Product – The product that you have placed an order on.
B/S – This states whether the position is a buy order or a sell order on that particular product.
Size – The number of lots that was placed on that particular currency pair.
Open Price – The price of the currency pair when you placed your order, whether it is a buy order or a sell order.
Floating P/L – The profit / loss for each of your orders. This number is dynamic and will fluctuate depending on the parameters of the order that you have placed.
Order No. (Detail Mode) – Order Number
Execute Date (Detail Mode) – The date and time on which the open order was executed
Execute Type (Detail Mode) – This indicates the type of order by which the order was executed, this can be market auto, market manual, Limit Daily or Limit GTF.

Section 1.3. Account Summary panel

The user can review his current portfolio and account information on the "Account Summary" panel by selecting View → Account Summary on the Menu Bar.

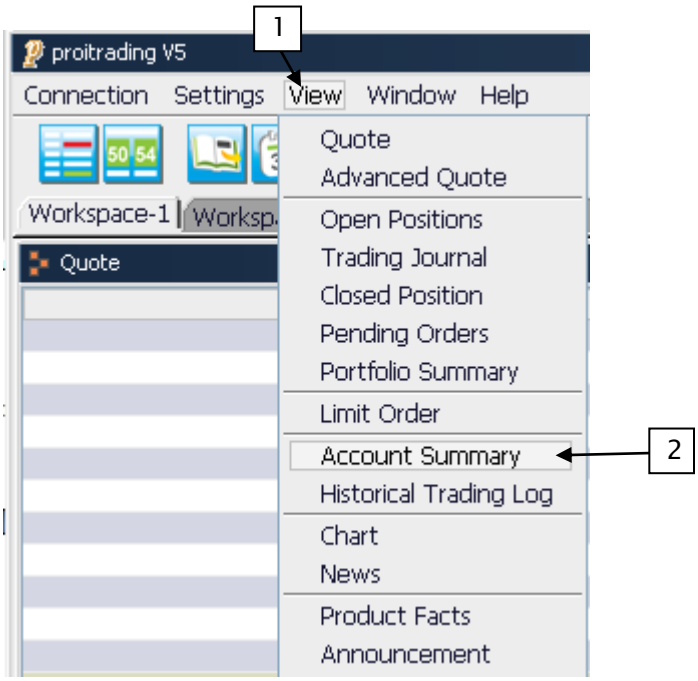

Figure 19

1. Click the "View" tab on the Menu Bar.
2. Click the "Account Summary" tab to open the Account Summary panel.

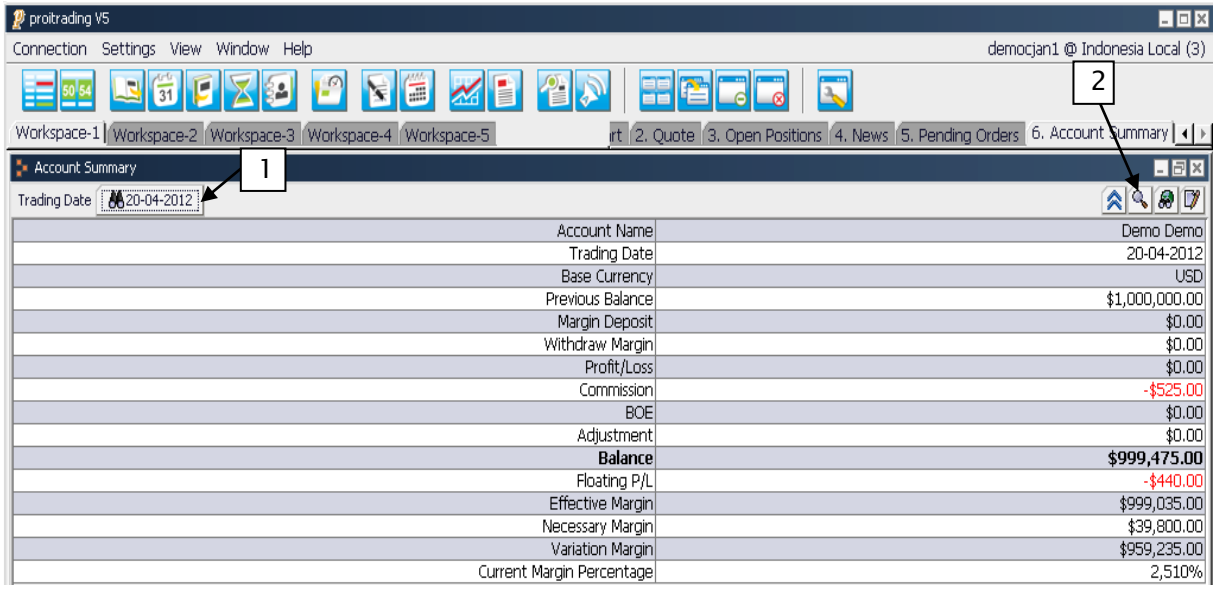

Figure 20

1. Click the “Trading Date” box to activate the Calendar window if necessary.
2. Click to show the printable account statement.

Trading Date – The date of the displaying account summery.
Base Currency – The base currency of the account.
Previous Balance – The account balance at the end of the previous trade day.
Margin Deposit – The amount of money deposited into the account in the stated trade day.
Withdraw Margin – The amount of money withdrew from the account in the stated trade day.
Profit / Loss – The realized profit / loss in the stated trade day.
Commission – The amount of commission charged.
Adjustment – Other adjustments made to the account.
Balance – The actual amount of money in the account.
Floating P/L – The total floating profit / loss of all outstanding positions.
Effective Margin – The equity of the account
Necessary Margin – The amount of margin required for all outstanding positions.
Variation Margin – The maximum available margin for trading.

* Please refer to Section 10.2 for the details of Account Statement.

Section 1.4. Real-time chart

The Real-time chart is loaded on default. Alternatively this panel can be found by selecting View → Chart on the Menu Bar.

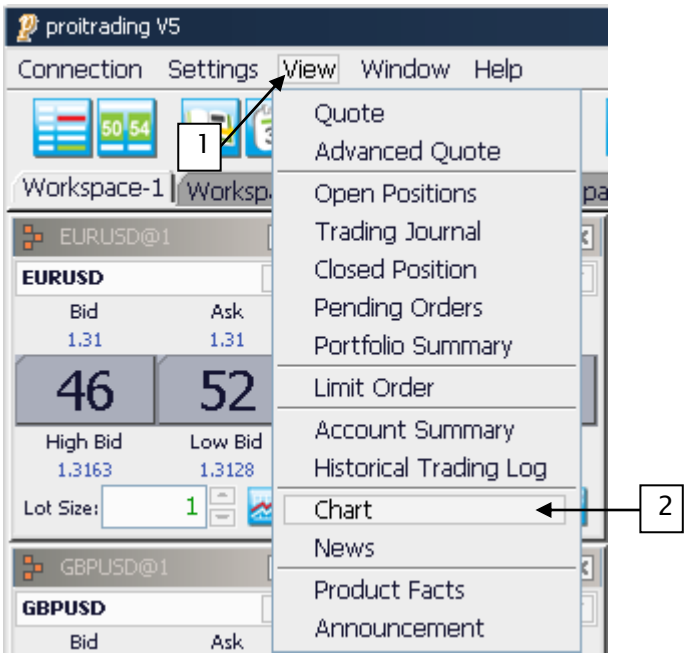

Figure 21

1. Click the “View” tab on the Menu Bar.
2. Click the “Chart” tab to open the Real-time chart.

The real-time chart shows the trend and movement of the price of the selected product, A light-blue vertical and horizontal line will be shown which will follow the position of the mouse cursor on the chart, the corresponding figures and price level represented by both of these lines are displayed on the top right of the chart and also on the y-axis on the right of the chart. The menu on the top of the chart allows you to choose product, chart type and scale. In addition, multiple technical analyses and indicators can be added to the chart. Please refer to Section 10 for further details on chart usage.

Figure 22

Product – Simply select the desired product in the menu for viewing on the chart.
Settings – Select the Look & Feel that applies to the whole chart.
Chart Type – Select the type of line to be used on the chart.
Time Scale:

Min – Select the time scale represented by each OHLC Bar or Candle Stick (selected on Chart Type) on the chart.

Points – Select the period of interest to be shown on the chart (e.g. 100 Points will show the last 100 OHLC Bar or Candle Stick on the chart).

Studies – Select from a large range of technical analysis functions that can be applied on the chart.
Draw / View – Select the type of manipulative functions to be applied on the chart.

The unit for the horizontal x-axis is time/ date, and the unit for the vertical y-axis is the value/ pips of the product. It should be noted that the range shown on both of these axes will depend on the time frame and number of points specified under the "Time Scale" menu item.

Section 1.5. Real-time news

The Real-time news is loaded on default. Alternatively this panel can be found by selecting View → News on the Menu Bar.

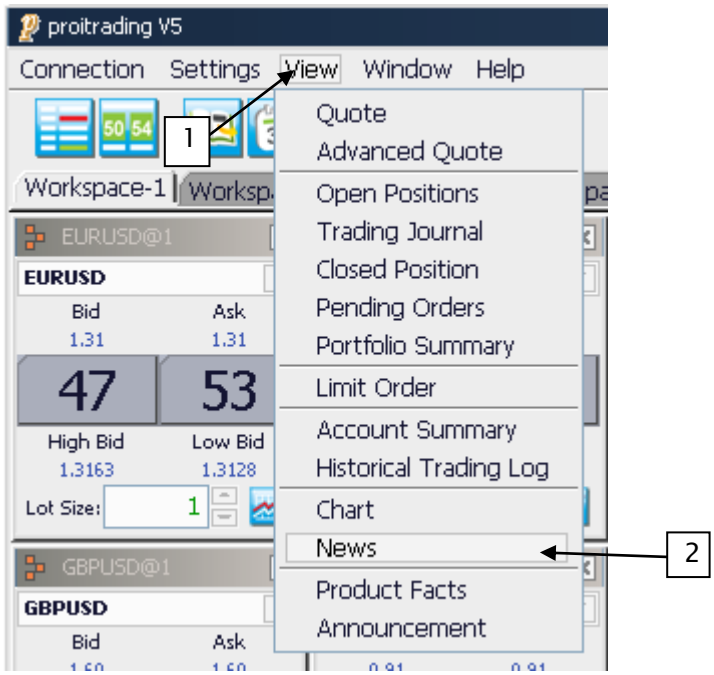

Figure 23

1. Click the “View” tab on the Menu Bar.
2. Click the “News” tab to open the Real-time news chart.

User can view the real time news header in the real-time news panel.

DJ MARKET TALK: USD/JPY Well Placed To Break Higher - Commerzbank
Font
Print
Save
0737 GMT [Dow Jones] USD/JPY is well placed to break higher, says Commerzbank technical analyst Karen Jones. She suspects the downside correction ended at 80.29, and now looks for a daily close above the 81.93 resistance line. This would be enough to trigger a run to the 83.31 March highs. USD/JPY now at 81.80. (gary.stride@dowjones.com)

Figure 35

1. Select “Limit Settle Log” on the top bar.
2. Click on the “From” button to choose the first date of a week to retrieve that week’s limit settle log.
3. Click on the “To” button to choose the last date of a week to retrieve that week’s limit settle log.
4. The create date of the Limit Settle ticket.
5. The modified date of the Limit Settle ticket.

Ticket No. – The ticket number of the limit settle order
Create Date/Last Modified – the creation order last modified date of the limit settle order
Execute Date – The execution date of the limit order
Product – The product of the limit settle order.
B/S – This states whether the limit settle order is/was a buy order or a sell order.
Size – The total number of lots in the limit settle order.
Limit Price – The limit execution price of the particular limit settle order.
Stop Price – The stop execution price of the particular limit settle order.
To Settle – This show the information about the particular opened market order of which the limit settle order applies to.
Status/Remarks – The status of the limit open order.

* Step 4 and Step 5 will only appear if user has amended that limit Settle order ticket.

Section 1.9. Trading Log panels

Section 1.9.1. Trading Journal

The user can review his daily trading history on the “Trading Journal” panel which can be found by selecting View → Trading Journal on the Menu Bar. Both open and settled positions of the current trading day will be displayed on this panel.

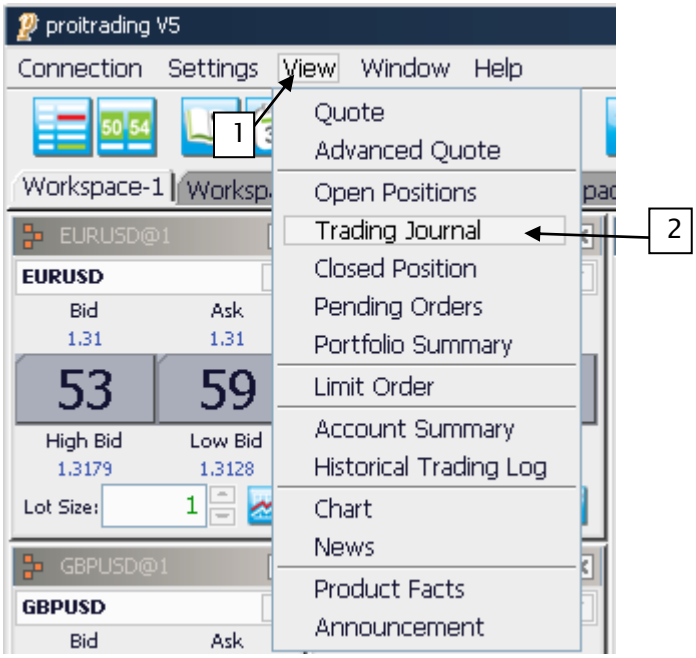

Figure 36

1. Click the "View" tab in the Menu Bar.
2. Click the "Trading Log" tab to review the daily trading history.

Execute Date	Product	B/S	Lot Size	Price	To Settle	Type	
20-04-2012 14:16:51	JPK50	Sell	2	9560	N/A	Open	Out
20-04-2012 14:16:57	GBPUSD	Sell	6	1.6066	N/A	Open	Out
20-04-2012 14:17:03	JPJ30M2	Sell	5	9560	N/A	Open	Out
20-04-2012 14:17:28	JPJ30M2	Buy	3	9570	N/A	Open	Out
20-04-2012 14:17:30	JKU50	Buy	4	9565	N/A	Open	Out
20-04-2012 14:17:38	GBPUSD	Sell	5	1.6066	N/A	Open	Out

Figure 37

1. Click on the arrow button to toggle the table view to detail mode.

Section 1.9.2. Historical Trading Log

The user can review his trading history on the "Historical Trading Log" panel which can be found by selecting View → Historical Trading Log on the Menu Bar. Histories of both buy and sell orders during the selected period will be displayed on this panel.

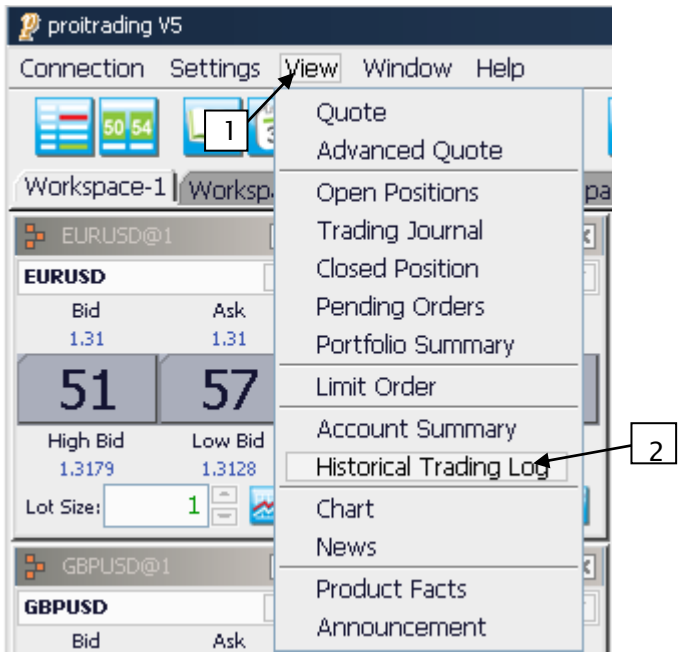

Figure 38

1. Click the "View" tab in the Menu Bar.
2. Click the "Historical Trading Log" tab to review the trading history.

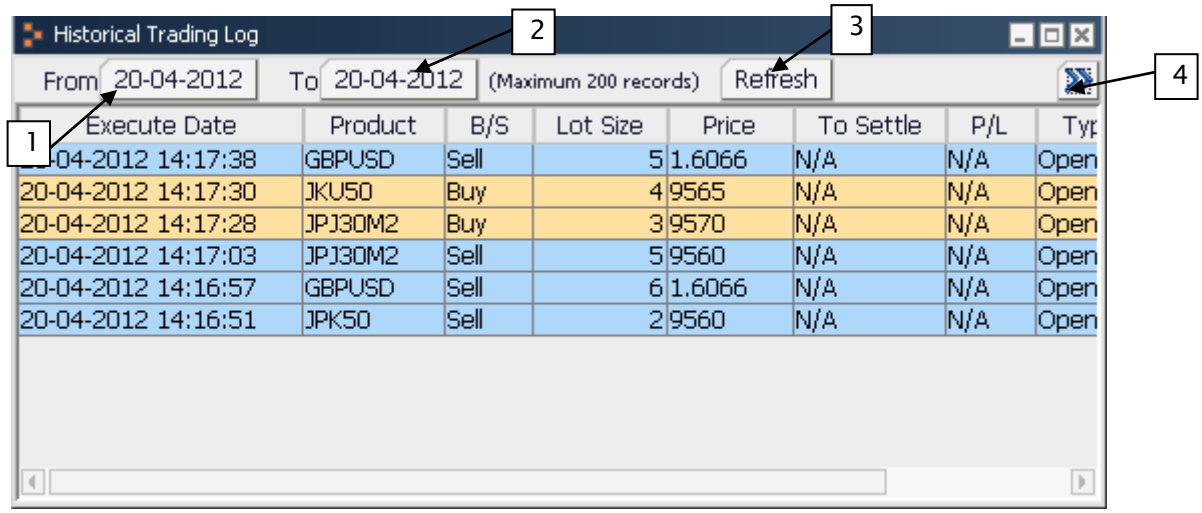

Figure 39

1. Click on the "From" button to choose the starting date of your interested period.
2. Click on the "To" button to choose the ending date of your interested period.
3. Click on the "Refresh" button after selecting the "From" and "To" dates to display the log records.
4. Click on the "To Detail Mode" button to toggle the table view to detail mode.

Execute Date – The date and time of the transaction.
Product – The product that you have placed an order on.

B/S – This states whether the order was a buy order or a sell order on that particular currency pair
Size – The number of lots that was placed on that particular currency pair.
Price – The execution price of the transaction
To Settle – For Closed Position, this indicate the information of the corresponding open position.
P/L – The floating profit / loss for each of your orders. This number is dynamic and will fluctuate depending on the parameters of the order that you have placed.
Type – This indicates whether the transaction is an open or settle order.
Status – Status of the transaction.
Order No. (Detail Mode) – Order number.
Ticket No. (Detail Mode) – Ticket number for the corresponding record.
Create Date (Detail Mode) – The date and time of which the order was created.
Execute Type (Detail Mode) – The type of execution of the order.

Section 1.10. Closed Position

The user can review his daily settlement on the "Closed Position" panel by selecting View → Closed Position on the Menu Bar.

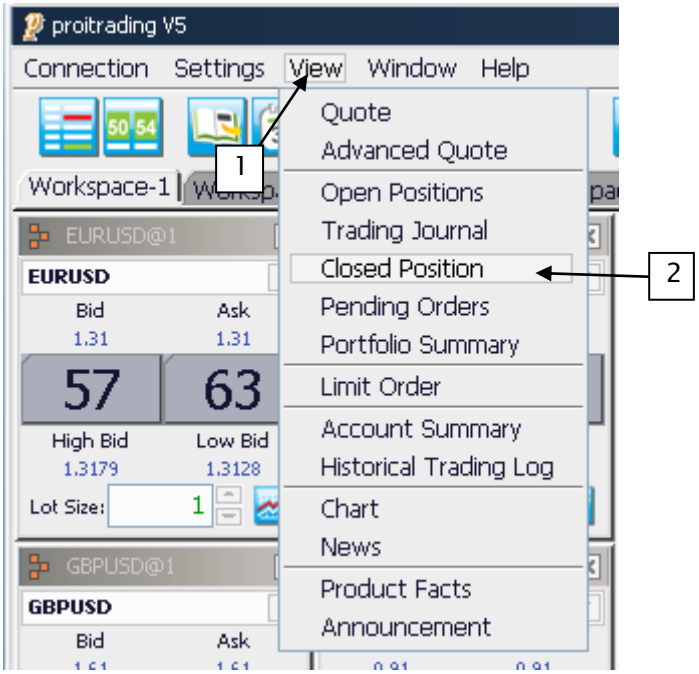

Figure 40

1. Click the "View" tab in the Menu Bar.
2. Click the "Closed Position" tab to review the daily Closed Position.

Figure 41

Settle Date – The settle date of the closed position.
Product – Name of the settled product.
B/S – This states whether the settled order was a buy order or a sell order.
Size – The number of lots that was settled on that particular order.
Settle Price – The price used for the Closed Position.
Open Date – The date on which the corresponding position was opened.
Open Price – The open price of the corresponding position.
P/L – The amount of realized profit or lost.

Section 1.11. Announcement

The Announcement panel displays recent system news or announcements and can be opened by selecting View → Announcement on the Menu Bar.

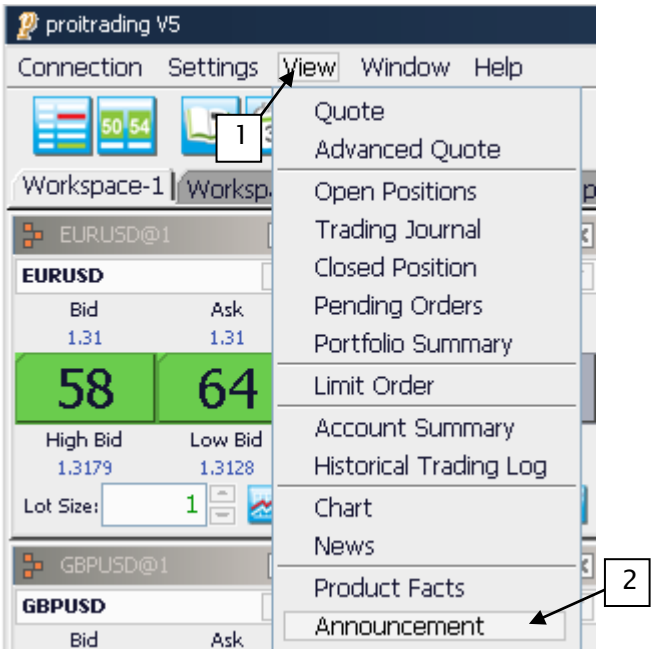

Figure 42

1. Click the "View" tab in the Menu Bar.
2. Click the "Announcement" tab to open the Announcement panel.

Figure 43

Section 1.12. Portfolio Summary panel

A summary of all outstanding position is shown on this panel, this can be found by selecting View → Portfolio Summary on the Menu Bar.

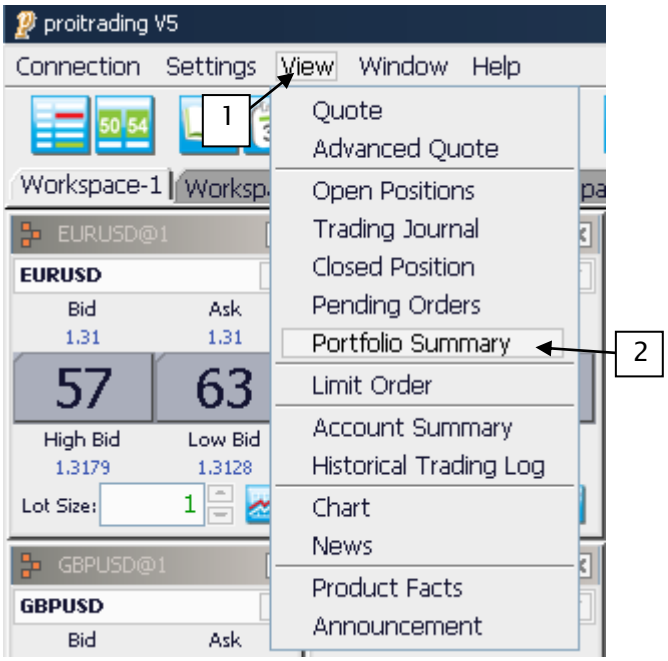

Figure 44

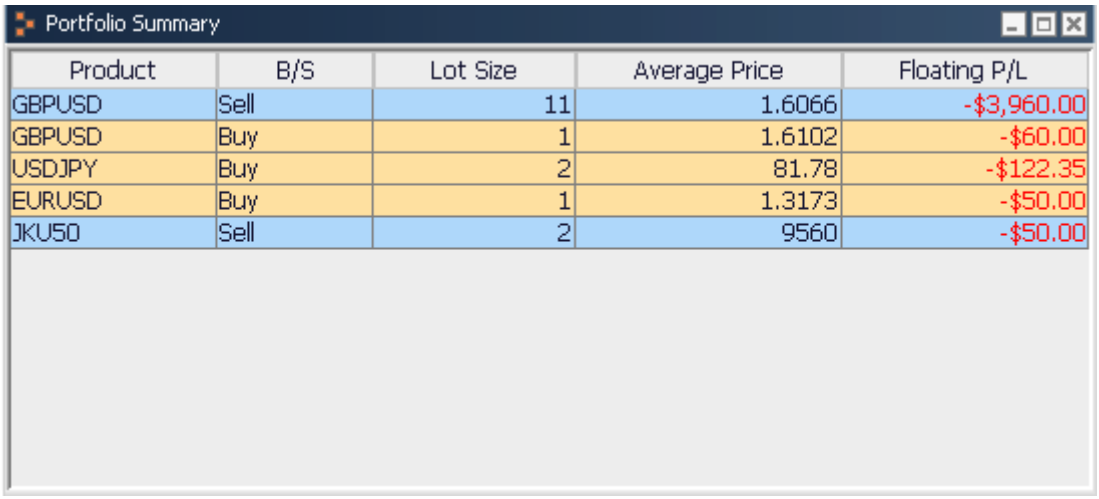
1. Click the "View" tab in the Menu Bar.
2. Click the "Portfolio Summary" tab to open the Portfolio Summary panel.



Product	B/S	Lot Size	Average Price	Floating P/L
GBPUSD	Sell	11	1.6066	-$3,960.00
GBPUSD	Buy	1	1.6102	-$60.00
USDJPY	Buy	2	81.78	-$122.35
EURUSD	Buy	1	1.3173	-$50.00
JKU50	Sell	2	9560	-$50.00

Figure 45

Product – The product occurring in your Open Positions.
B/S – This states whether the particular order was a buy order or a sell order.
Size – The total number of lots outstanding for the particular product.
Average Price – The average execution price for all orders
Floating P/L – The sum of floating profit/ loss for all orders with the same product.

Section 1.13. Product Facts panel

Interest Swap of all products is listed in the Product Facts panel. You can open this panel by View → Product Facts in the Menu Bar.

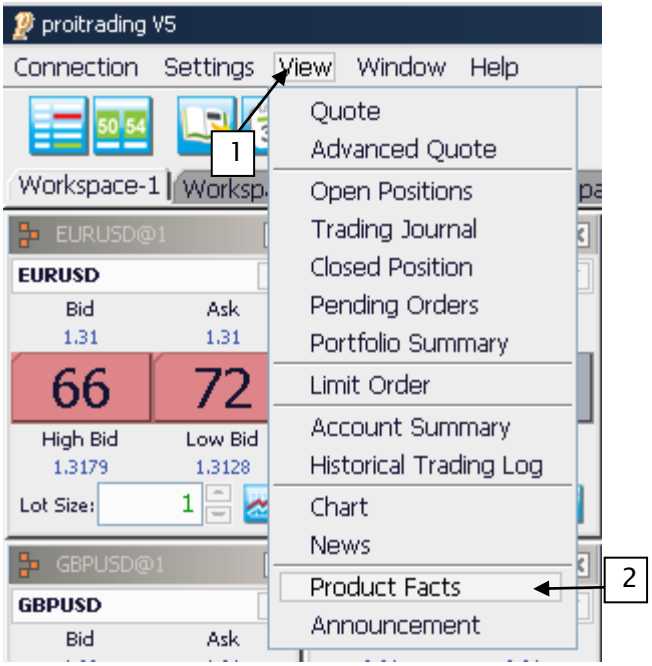


Figure 46

1. Click the “View” tab in the Menu Bar.
2. Click the “Product Facts” tab to open the Product Facts panel.

Effective Date	Expiry Date (CFD Only)	Currency	Closing Price	Contract Size	Buy Interest	Sell Interest	Interest Type

Figure 47

1. Click on the “Server Trade Date” button to choose the date.

Effective Trade Date – The date of the displayed interest that applies to.
Product – The product of the stated interest applies to.
Contract Size – Size of one lot.
Buy Interest – The interest that applies to a Buy order of a particular product.
Sell Interest – The interest that applies to a Sell order of a particular product.
Interest Type – Whether it is a swap or interest rate.

Section 2. System Settings

All user-side system settings, such as looks, reply formats and the passwords can be found under both the “Setting” and the “Windows” menu item on the Menu Bar.

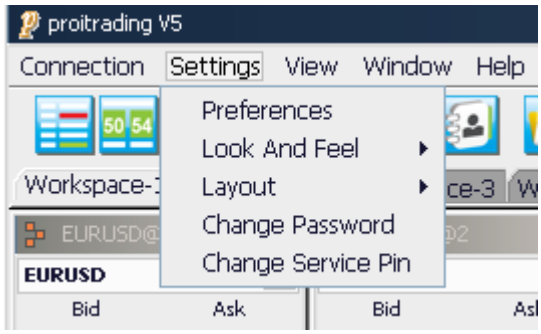

Figure 48

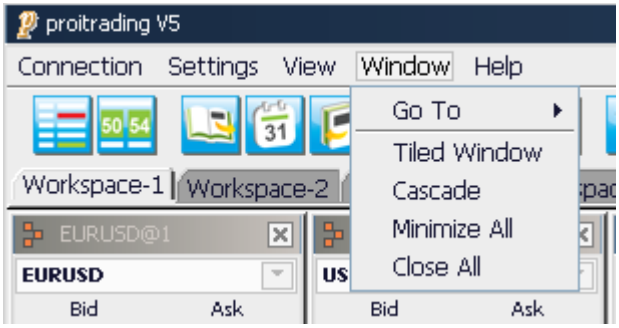

Figure 49

Section 2.1. Setting

Section 2.1.1. Config

Quote configuration could be managed according to the user preferences. This is a function that allows the user to define the information to be displayed on the Quote panel (Real-Time Price Viewer).

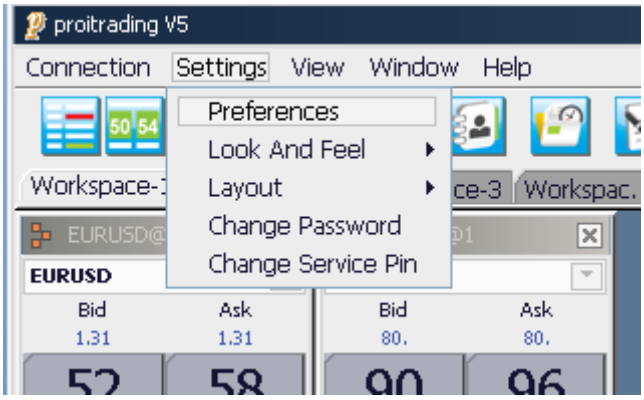

Figure 50

1. Click the “Setting” tap on the Menu Bar.
2. Select “Preferences”, then a panel will pop up as follow.

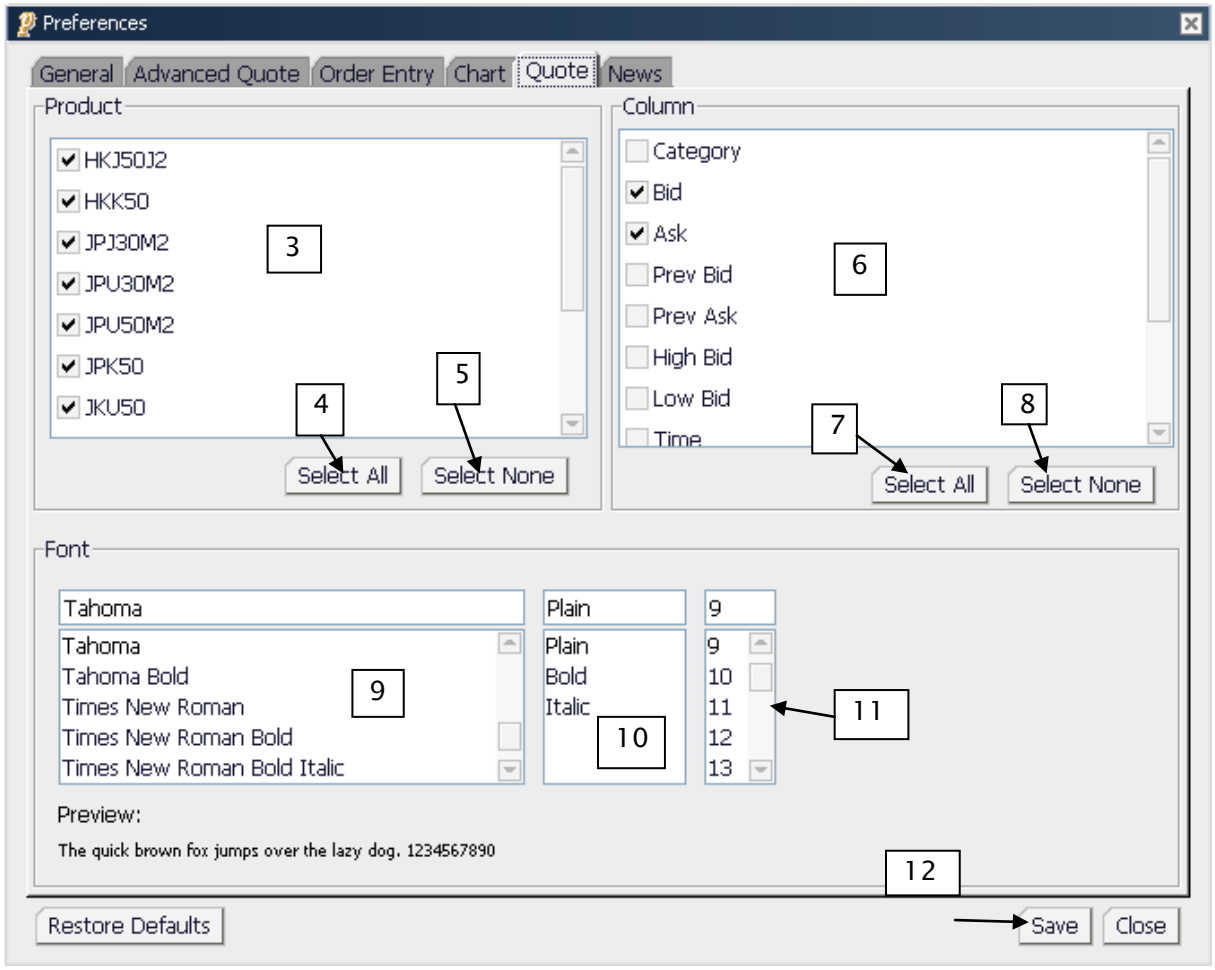

Figure 51

3. User can tick the products which they prefer to be displayed.
4. Click the “Select All” button to select all currencies shown.
5. Click the “Select None” button to deselect all currencies shown.
6. User can tick the columns which they prefer to be displayed.

7. Click the “Select All” button to select all available information columns.
8. Click the “Select None” button to deselect all available information columns.
9. User can choose the Latin text font of the words being displayed.
10. User can choose the font style of the words being displayed.
11. User can choose the font size of the words being displayed.
12. Click the “Save” button to save the preferences

13. Click the “OK” button to completed saved and exit.

Alternatively, these Config function can also be accessed by right-clicking the mouse on the Quote panel as shown in the figures below.

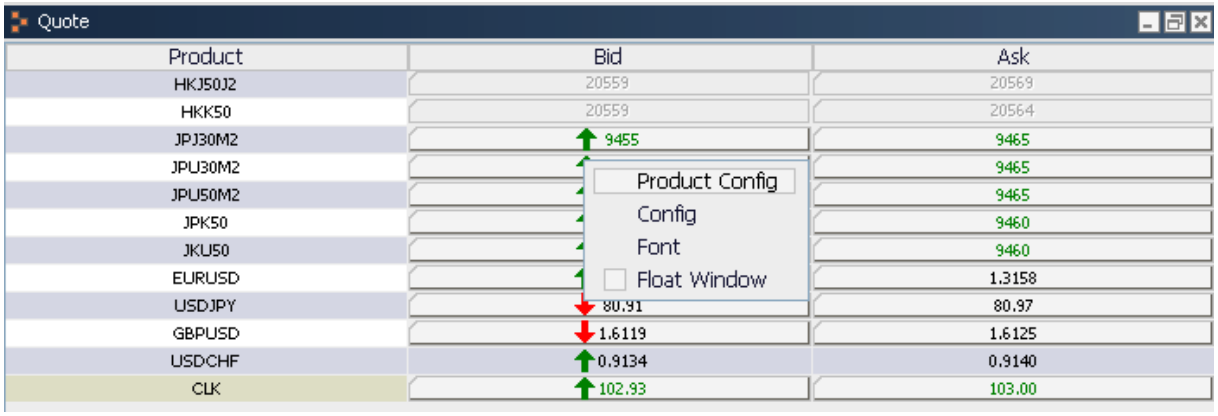

Figure 52

Section 2.1.2. Font

The font style and size of the contents shown in the quote panel can be changed under the “Font” item.

Section 2.1.3. Look And Feel

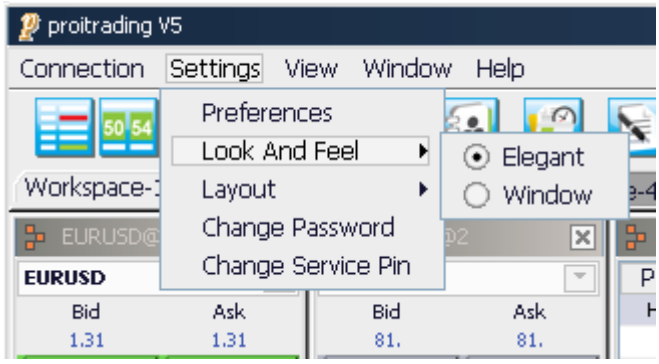

Figure 53

Section 2.1.4. Layout

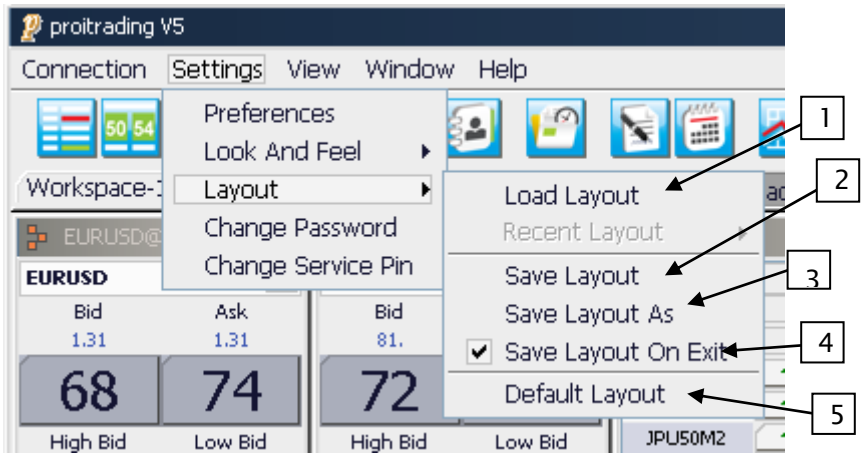

Figure 54

1. User could open the saved layout.
2. User could save the current layout.
3. User could save the current layout under a different file name.
4. Select this to allow auto save layout on exit.
5. User could load the default system layout.

Both “Load Layout” and “Save Layout” operates on the same default file. However, user can also save more than one preferred layout settings using the “Save Layout As” function as shown below.

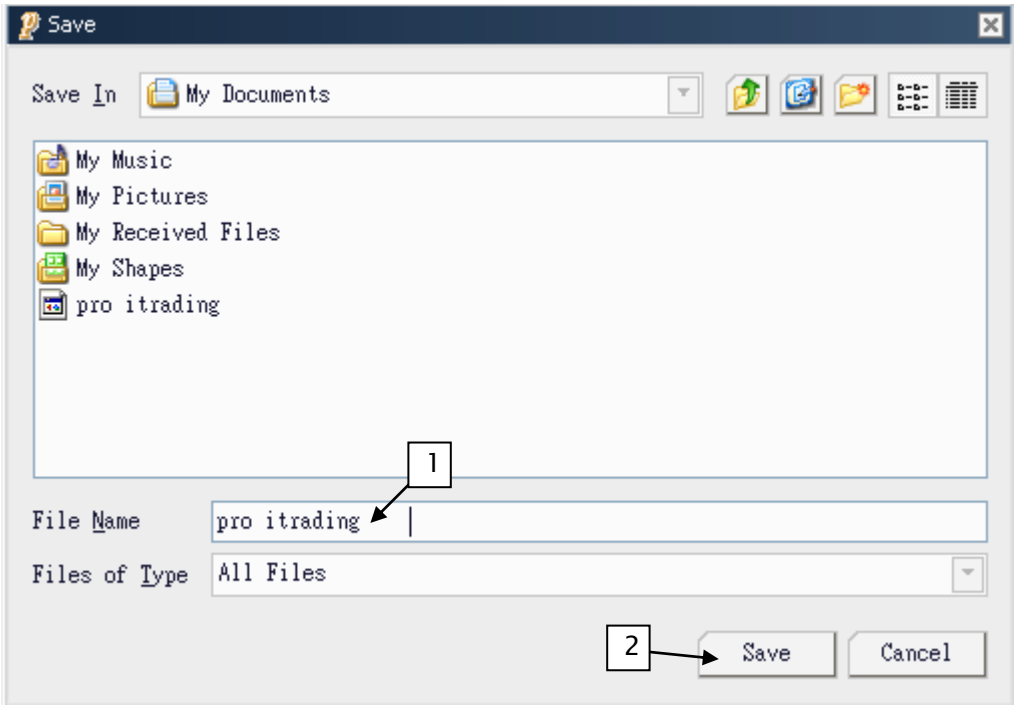

Figure 55

1. Type in the file name for the layout setting to be saved.
2. Click the “Save” button to save the file.

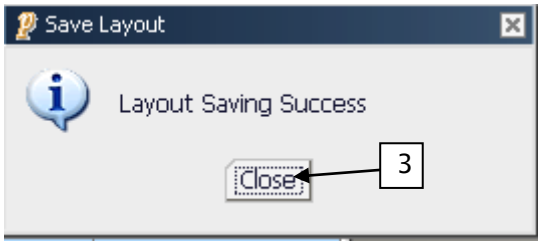

Figure 56

3. Click the “Close” button to close the layout saving success message dialog box.

To load back the saved layout settings, use the “Load Layout” function as shown below.

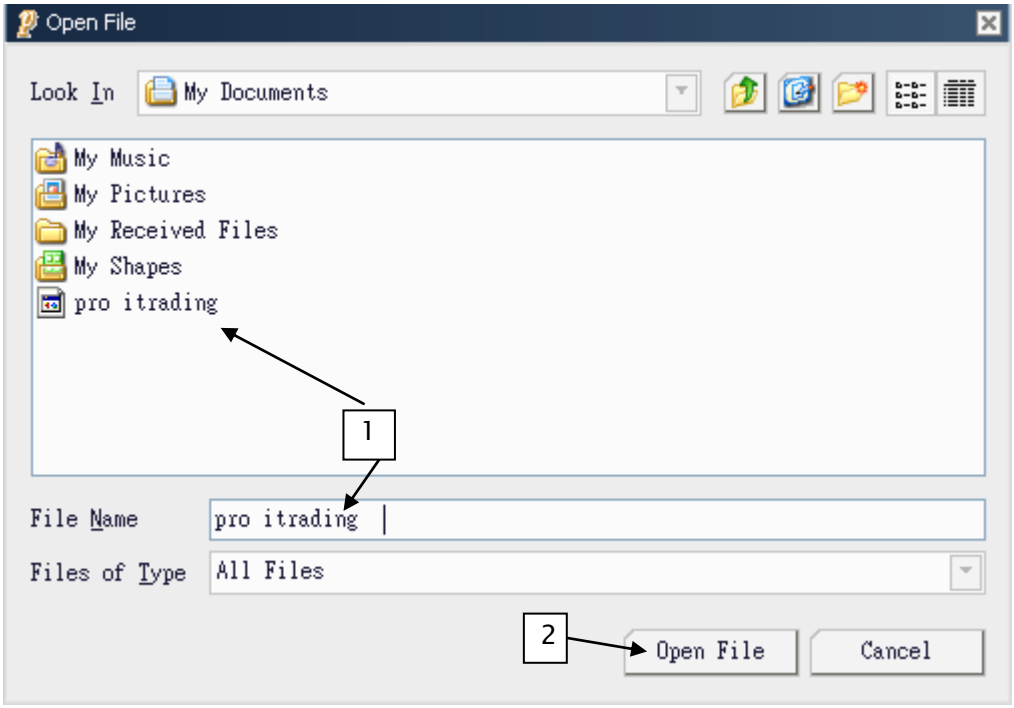

Figure 57

1. Locate and click on the saved file or type in the file name.
2. Click the “Open File” button to load the saved layout.

Section 2.1.5. Confirm Setting

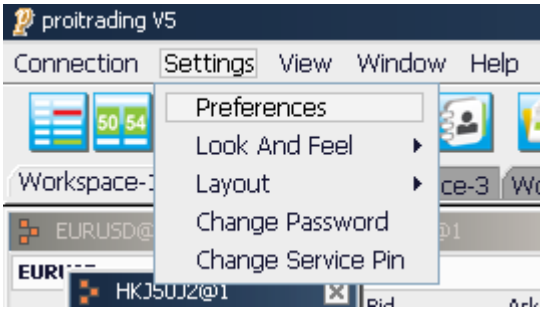

Figure 58

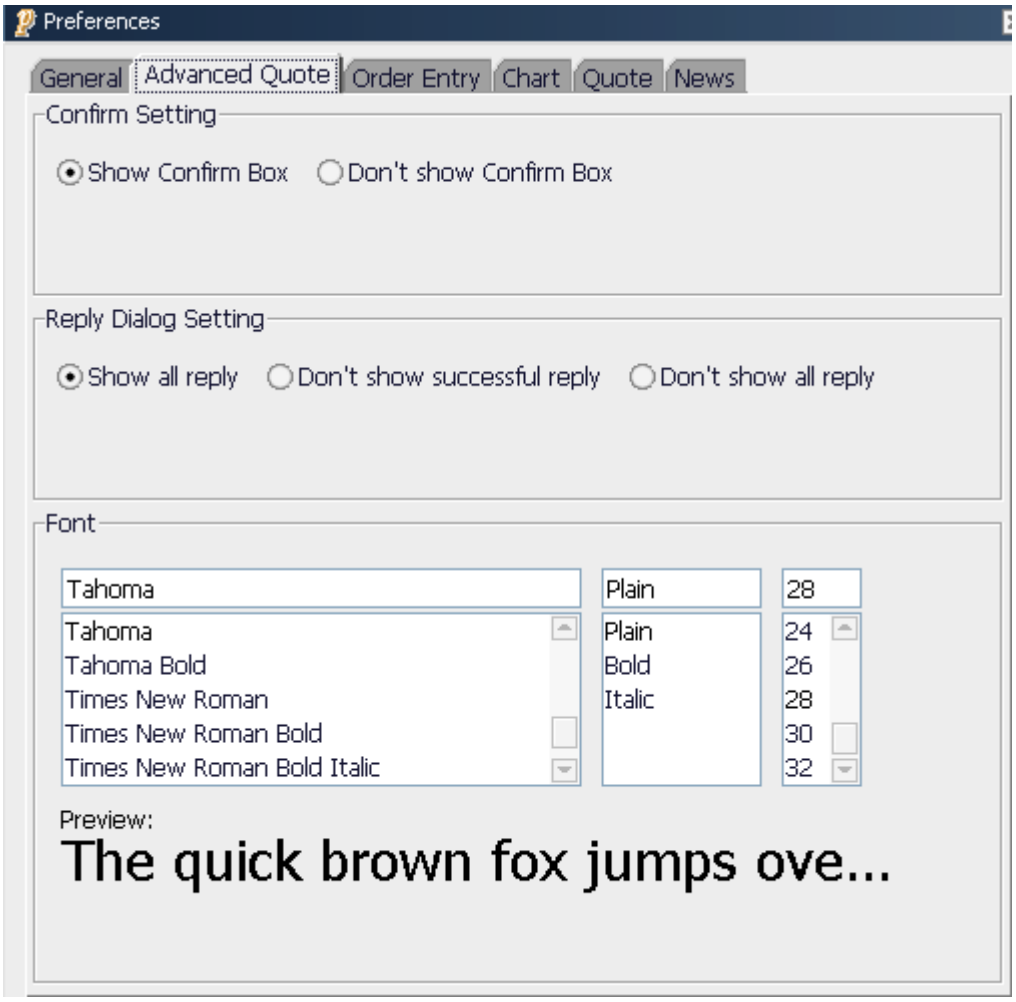
1. Click the “Setting” tap on the Menu Bar.
2. Select “Preferences”, then a panel will pop up as follow.



User could choose whether he or she wants the system to show Confirm pop-up notice or not.

Section 2.1.6. Reply dialog setting

This function gives you the option to choose the kind of system reply message you would like to receive.

Choosing “Don’t show all reply” to limit all system reply messages.
Choosing “Don’t show successful reply” to limit all success system reply messages.
Choosing “Show all reply” to display all system reply messages.

Section 2.1.7. Change Password & Change Service Pin

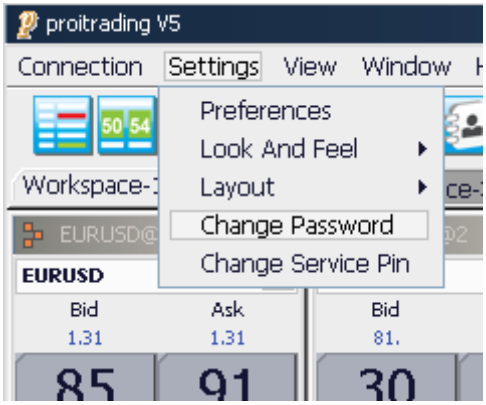


Figure 59

* Please refer to section 11 for further details.

Section 2.2. Windows

The “Window” item on the Menu Bar provides manipulative functions that can be applied to any opened information panels. User can use this function to view the panels in different ways.

Section 2.2.1. Go To

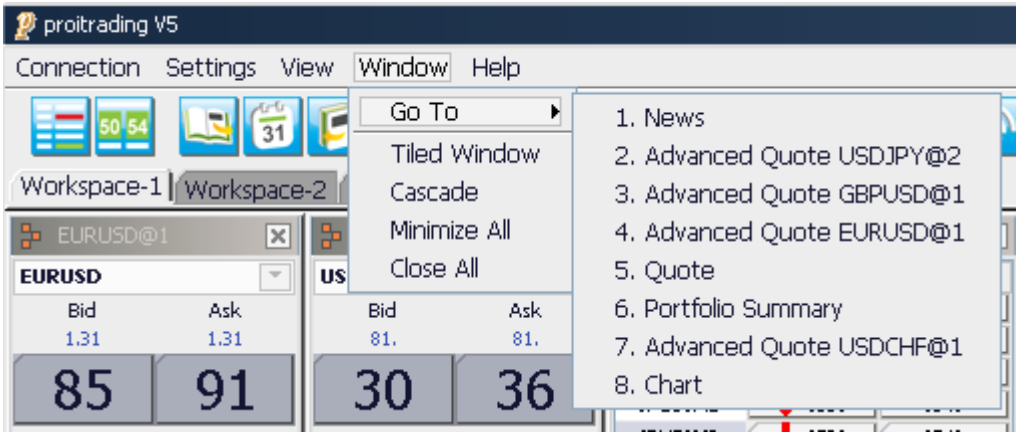

Figure 60

1. Select “Go To” and choose from the opened panel list to go directly to that panel.

Section 2.2.2. Tiled Window

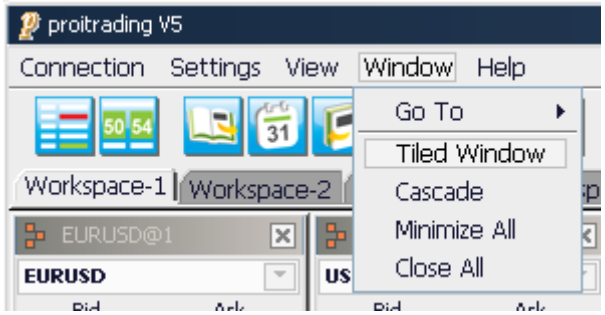

Figure 61

1. User can choose this function to tiled all opened information panels.

Section 2.2.3. Cascade

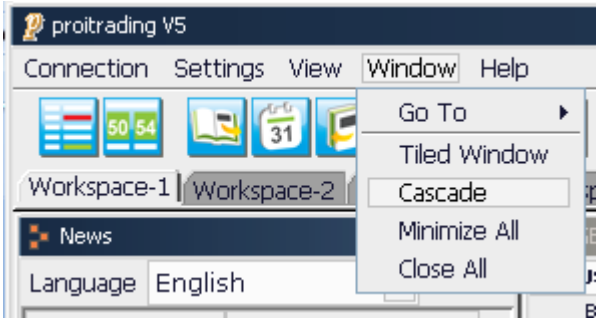

Figure 62

1. User can use this function to reorganize the arrangements of all opened panels as shown below.

Figure 63

Section 2.2.4. Minimize All

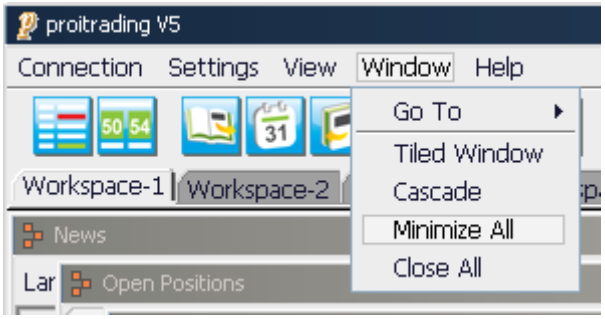

Figure 64

1. User can use this function to minimize all the opened panels as shown below.

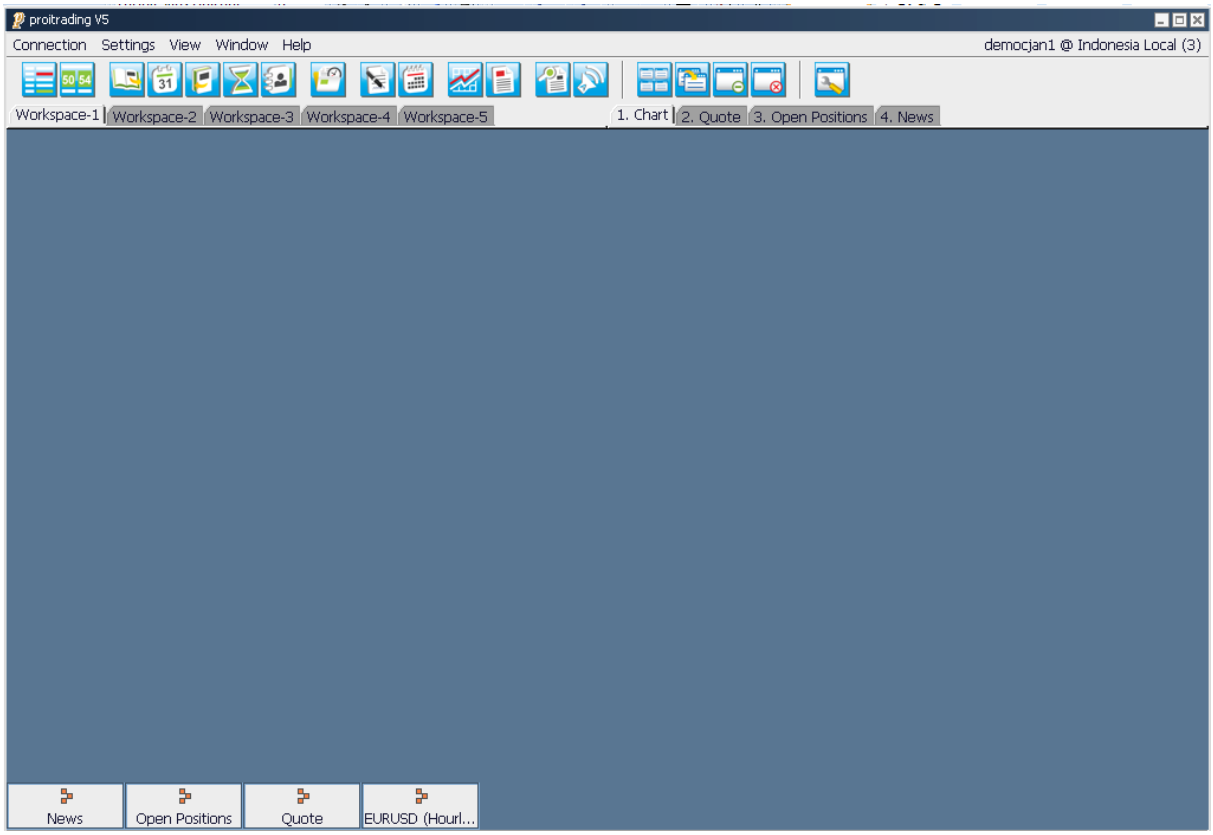

Figure 65

Section 2.2.5. Close All

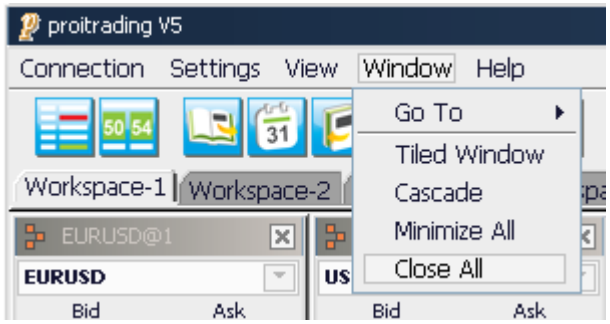

Figure 66

1. User can use this function to close all the opened information panels.

Section 3. Login

If it is the first time you login to Pro iTrading System, please click “Always” to trust the applet certificate as shown in Section 3.1

After the system is loaded, a login page will appear. User will be provided with a valid login ID and password after opening an account with our company. Please contact our customer service personnel for more details on how to open an account with us.

Figure 67

1. Enter your Login ID and Password.
2. Click the drop down menu to select your system language.
3. Select one of the following channel to login
4. Click the “Login” button.

* Step 5 to step 10 below are only required for first time login.

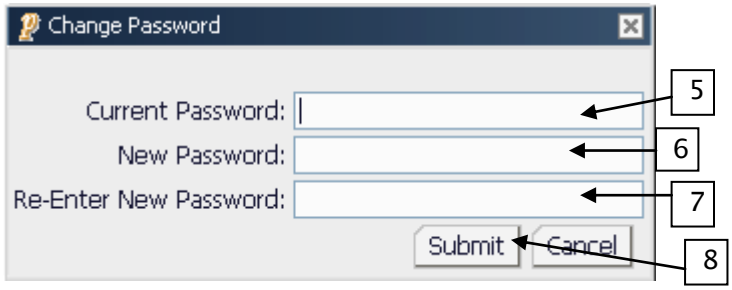

Figure 68

5. Enter your current password.
6. Enter your new password.
7. Confirm new password.
8. Click the “Submit” button to continue.

Figure 69

9. Click “Close” to dispose the dialog box

If user quits the system by the “Logout” button under “Connection” on the Menu Bar (please refer to Section 3.2 for the details of Logout action) instead of closing the web browser or the software application (depending on whether you use the web version or the download version of Pro iTrading), the system will jump back to the front screen. User can login again by clicking “Login” in the same “Connection” menu.

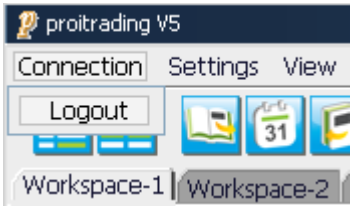

Figure 70

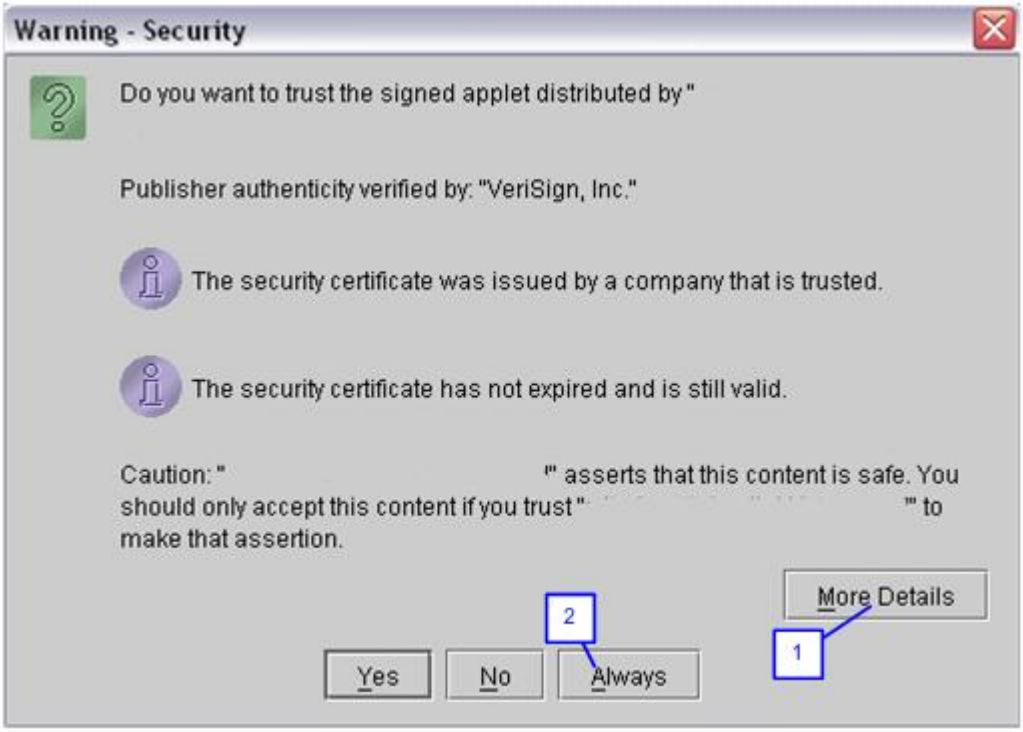
Section 3.1. Applet Certificate



Warning - Security
Do you want to trust the signed applet distributed by "
Publisher authenticity verified by: "VeriSign, Inc."
The security certificate was issued by a company that is trusted.
The security certificate has not expired and is still valid.
Caution: "
'" asserts that this content is safe. You
should only accept this content if you trust "
'" to
make that assertion.

1
Yes
No
Always

Figure 71

1. Click “More Details” to view the details of the Certificate.
2. Click “Always” to trust the company to make the assertion permanent.

Section 3.2. Logout

To increase the safety of the account, user should always logout properly using one of the methods below.

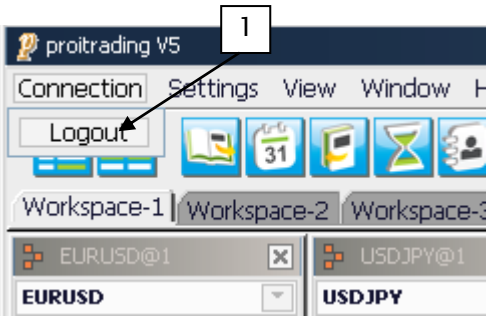

Figure 72

1. Users can logout by clicking the “Connection” in Menu Bar and then choose “Logout”.

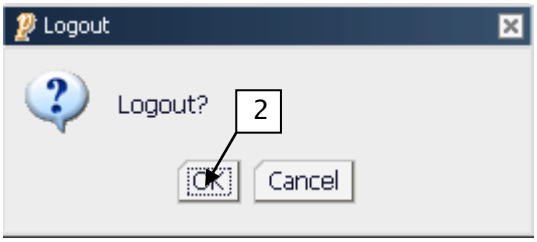

Figure 73

2. Click the “OK” button to confirm the logout action.

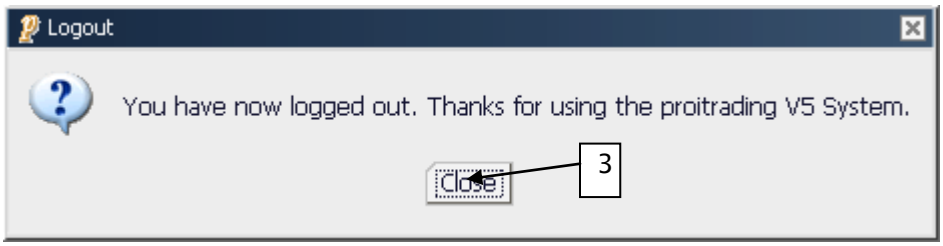

Figure 74

3. Click the “Close” button to close the dialog box indicating a successful logout.

On the other hand, users can logout by clicking the “Cross” button on the top right corner, either on the web browser or the application window depending on which version of Pro iTrading you are current using.

Figure 75

Any logout actions that are not included above will be considered as improper logout. For example, computer hang, network connection lost. For these situations, it is likely that Login Alerts would appear the next time you try to login to the Pro iTrading system. Please refer to section 4.3 for further details.

It is critically important that you logout your account when it is not being use or when you are not present at your logged in computer. Never leave your account login session unattended to avoid any unwanted changes; damages or losses occurred to your personal account.

Section 3.3. Login Alert

Section 3.3.1. Improper Logout

If the user did not logout the system properly during the last session, a warning message will appear and user will need to re-enter the password to confirm the Login. To avoid this situation and to ensure the safety of the account, it is strongly recommended that the user should always perform the logout procedure properly.

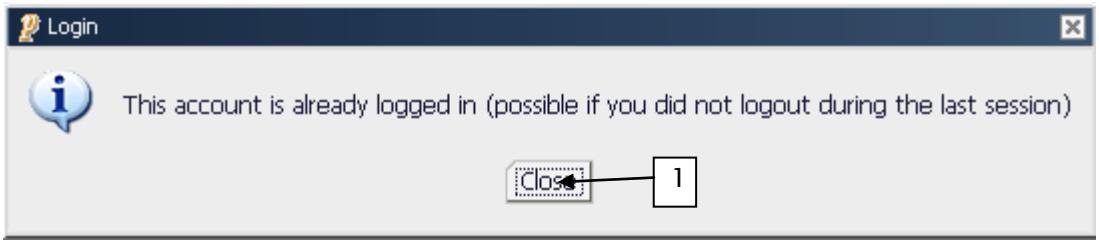

Figure 76

1. Click the “Close” button to dispose the information dialog box.

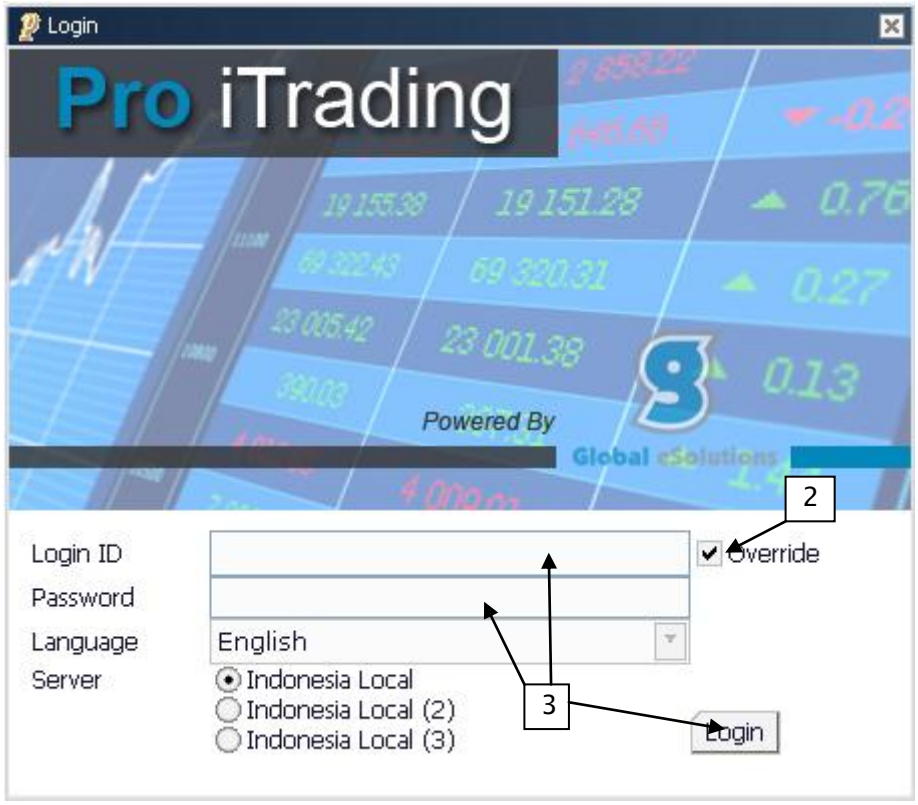

Figure 77

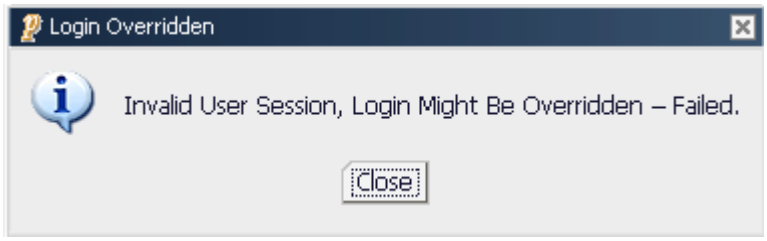
2. Check the "Override" check box to override the last session.
3. Ensure your login information is supplied then click the "Login" button.

Section 3.3.2. Login Override

If the following dialog box popped up when you are using Pro iTrading system, it means another party has logged in using your account information, and therefore terminating your current login session.

Such situation is possible with a shared account. However if this happens to a personal account where no other person other than the account owner should have the account access, then it is important for the user to contact his/ her account provider or customer service agent immediately to understand the situation and ensuring the safety of your personal account.



Login Overridden
Invalid User Session, Login Might Be Overridden – Failed.
Close

Figure 78

Section 4. Limit Order Type

Before completing a limit order, user must provide the following information.

1) Daily/GTF and
2) Limit Price/Stop Price/OCO.

Section 4.1. Daily/GTF

If user chooses the "Daily" radio box, the limit order will be effective within the current trade date. If the user chooses the "GTF" (Good-Till-Friday) radio box, the limit order will be effective till the coming Friday. Limit orders will be cancelled by the system automatically once they are not effective (i.e. when the chosen effective period has expired). User can always review all limit orders in the "Limit Open Log" (please refer to Section 1.8.2) or "Limit Settle Log" (please refer to Section 1.8.4).

Figure 79

Section 4.2. Limit Price/Stop Price/OCO

Limit Price is used when the user wants to wait until the market goes into more favorite condition. When the market price hits the limit price, the corresponding limit order will be executed.

For an effective Buy (Sell) Limit Order, the limit price must be at least a certain number of pips below (above) the current market Ask (Bid) price – Pips differentials.

Stop Price is used to close out a position in order to stop loss or profit, or to wait until the market goes into more extreme condition in order to open a new position if the price moves in the opposite direction by a certain amount of pips. When the market price hits the stop price, the corresponding stop order will be executed.

For an effective Buy (Sell) Stop Order, the stop price must be at least a certain number of pips above (below) the current market Ask (Bid) price – Pips differentials.

The interpretations of the Limit Price and the Stop Price depend on whether your Limit Open is a Buy Order or a Sell Order, and they can be summarized below.

For a Buy Order

- Limit Price must be lower than the current Ask price.
- Stop Price must be higher than the current Ask price.

For a Sell Order

- Limit Price must be higher than the current Bid price.
- Stop Price must be lower than the current Bid price.

OCO (One-Cancel-Other) order type is the combination of both limit order and stop order. The user needs to input both the limit price and the stop price for this kind of order. When the market price hits either the limit price or the stop price, the corresponding order will be executed. However, the remaining order at the other price level will be cancelled automatically. In addition to the pips differentials requirement mentioned above, the price difference between the OCO limit price and the OCO stop price must also be greater than certain number of pips.

When user wants to enter the limit price only, he can check the limit price radio box and enter the limit price.

Figure 80

When user wants to enter the stop price only, he can check the stop price radio box and enter the stop price.

Figure 81

When user wants to create an OCO limit order, user can check the "OCO" checkbox. Users are required to enter both the limit price and stop price.

Figure 82

A default price will be shown in the input box when the Limit/ Stop radio button or the OCO check box is checked. You may change your Limit Price or Stop Price by typing into the text box or by clicking the up / down arrows next to the text box.

If the number in the text box is shown in green, this means that the inputted Limit or Stop Price is valid according to specified conditions. However if the number is shown in red, this means such Limit or Stop Price is not valid or no longer available. In this case you will need to adjust the number accordingly.

Section 5. Market Open

If the user clicks on the Bid or Ask price of a particular product on the Real-time Price Viewer, the Market Order Ticket will appear. The selected product, buy or sell type, and the market price will already be filled in on the ticket based on the clicking location of the mouse. The user can fill in the lot size and submit the ticket as a Market Open Order.

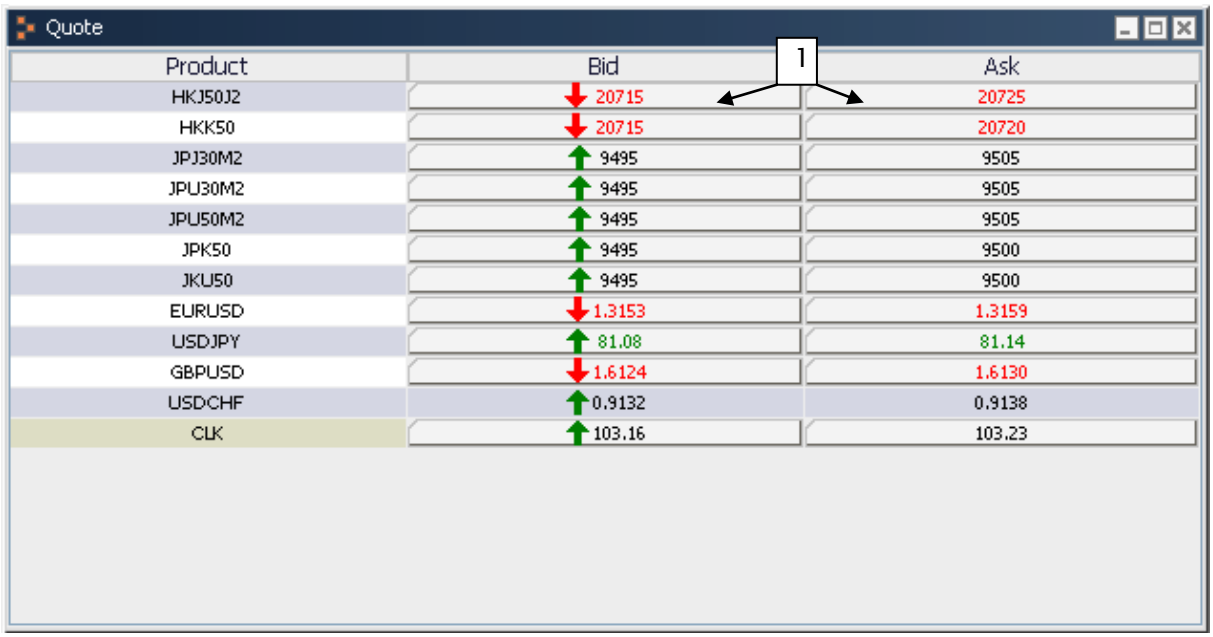


Figure 83

1. Click “Bid” side or “Ask” side to open a market order.

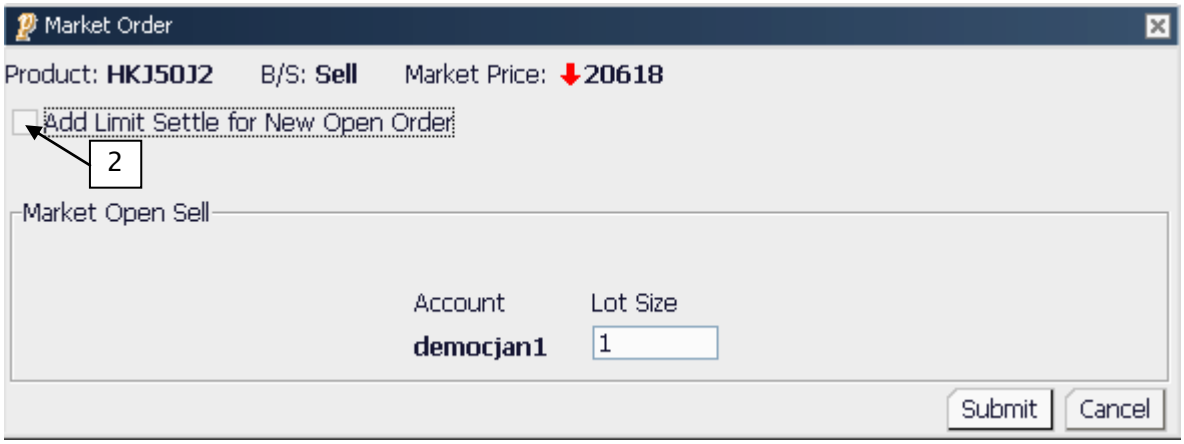

Figure 84

2. * Check “Add Limit Settle” if you want to add limit settle order on this outstanding position.

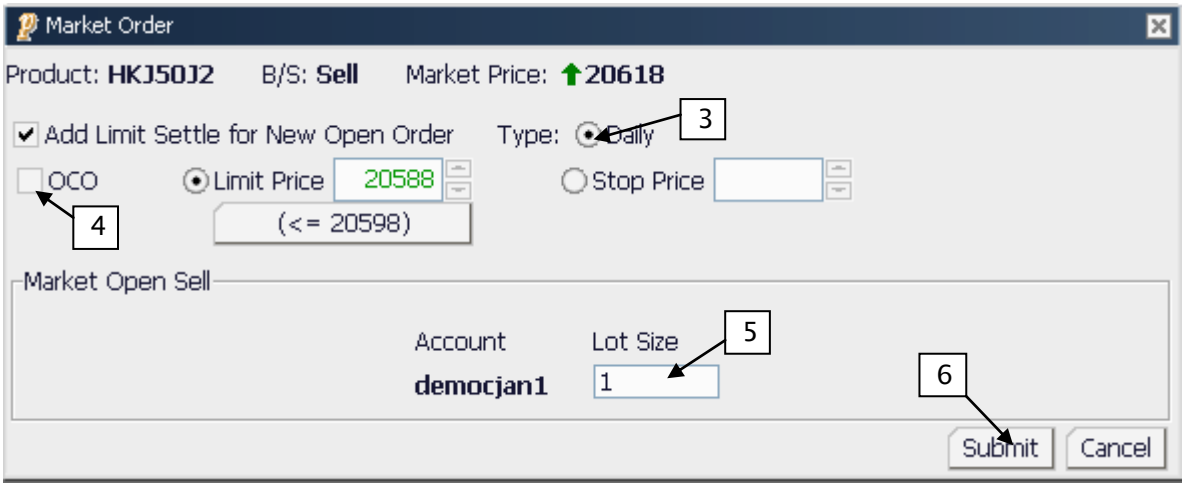

Figure 85

3. * Select the Limit Order type Daily/GTF. (please refer to Section 4.1 for the details of Daily/GTF)
4. * Click the "OCO" checkbox. (please refer to Section 4.2 for the details of Limit Price/Stop Price/OCO)
5. Enter the open size.
6. Click "Submit" to continue.

Section 7.3. Cancel limit open ticket

The Limit Open Order can be cancelled by clicking the "Cancel" button on the Limit Open panel. Once clicked, the Cancel Limit Open Reply will appear to indicate the successful cancellation of the limit order.

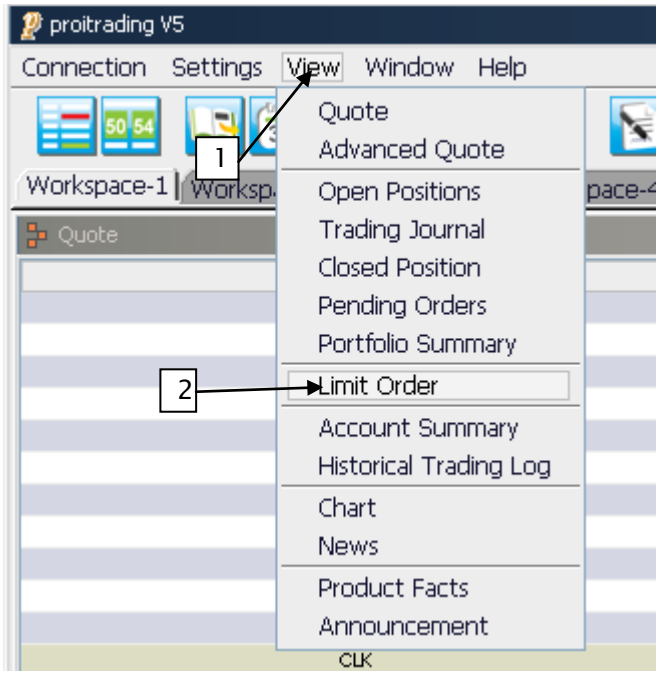

Figure 109

1. Select “View” from the Menu Bar.
2. Select “Limit Order” and system will pop up a new panel as follow.

Figure 110

3. Click the “Cancel” button to cancel a particular limit open ticket. The following dialog box will pop up.

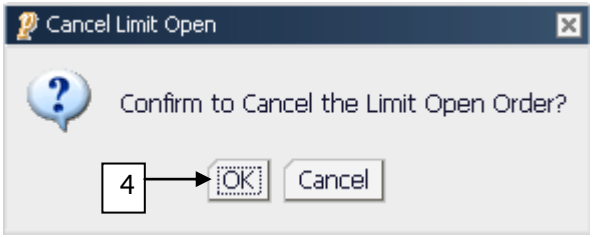

Figure 111

4. Click the “OK” button to confirm the cancellation.

Figure 112

5. Click the “Close” button to close the reply dialog box.

Section 8. Limit Settle

Section 8.1. Add Limit Settle ticket

There are two methods to add a limit settle ticket on an open position. The first method is adding the ticket from the “Limit Settle” panel.

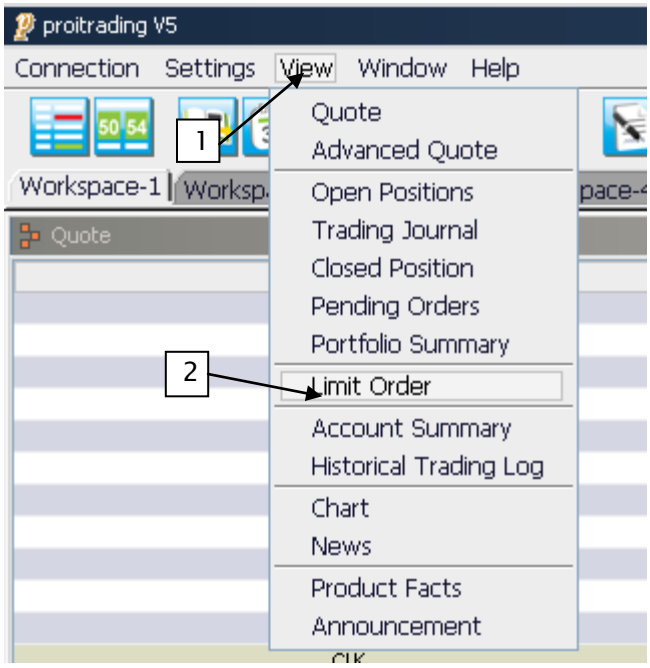

Figure 113

1. Select “View” from the Menu Bar.
2. Select “Limit Order” and system will pop up a new panel as follow.

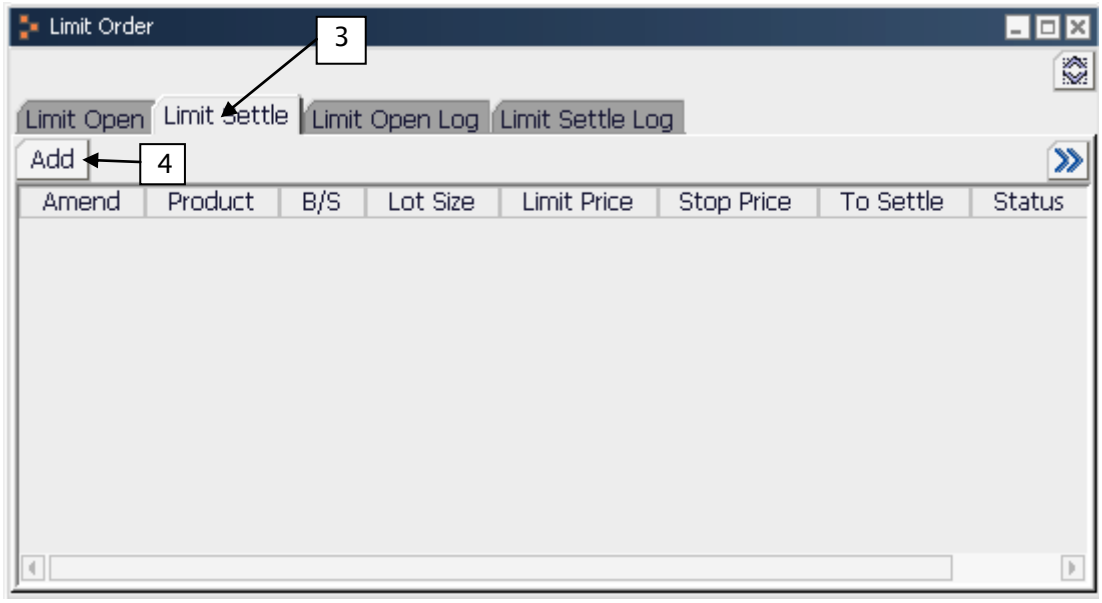

Figure 114

3. Select “limit Settle” on the top bar.
4. Click the “Add” button to continue.

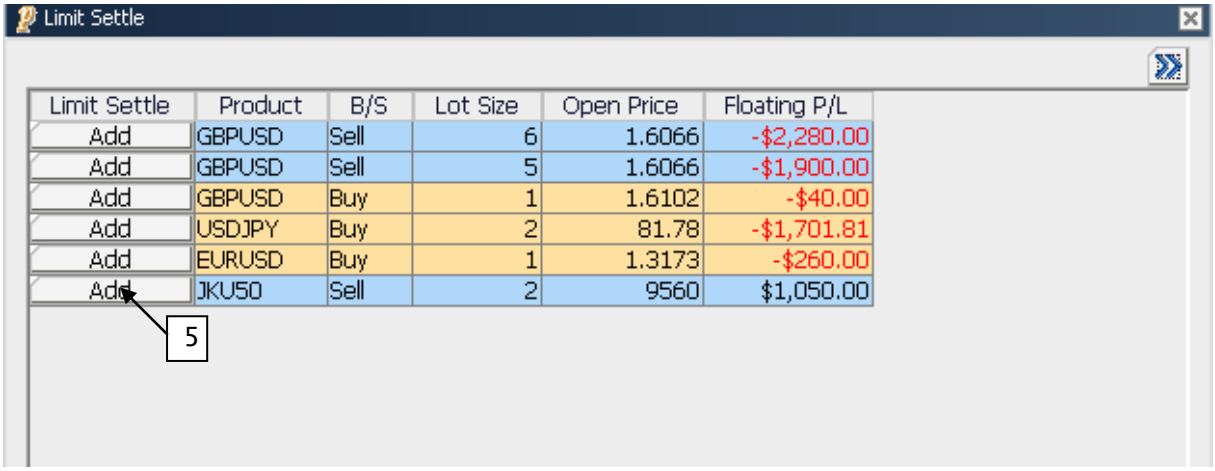

Figure 115

5. Click the “Add” button to open the Add Limit Settle Ticket.

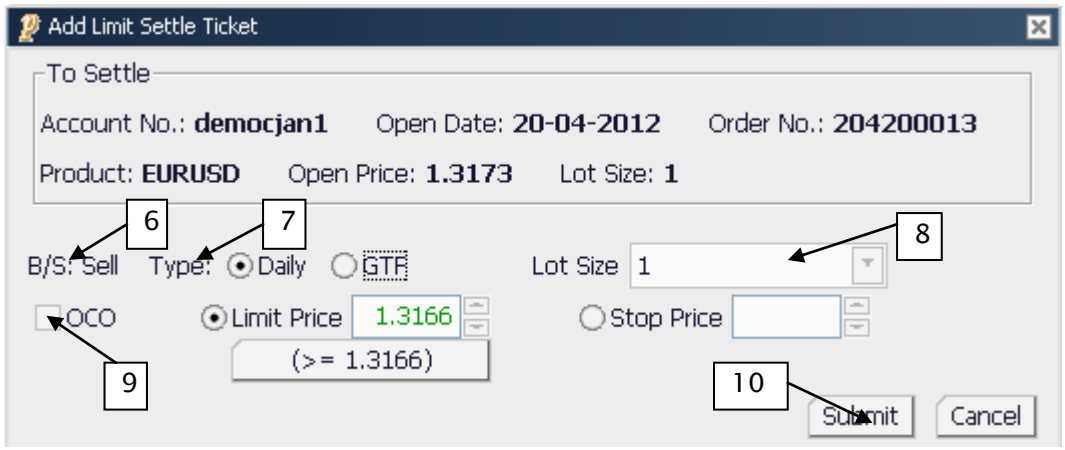

Figure 116

6. The Buy/Sell sides of the limit settle ticket.
7. Select the limit order type between daily and GTF by checking the corresponding radio box. (please refer to section 5.1 for the details of Daily/GTF)
8. Select the limit settle size in the drop down menu.
9. Choose the Limit order type OCO/Limit Price/Stop Price. (please refer to section 5.2 for more details)
10. Click the "Submit" button to continue.

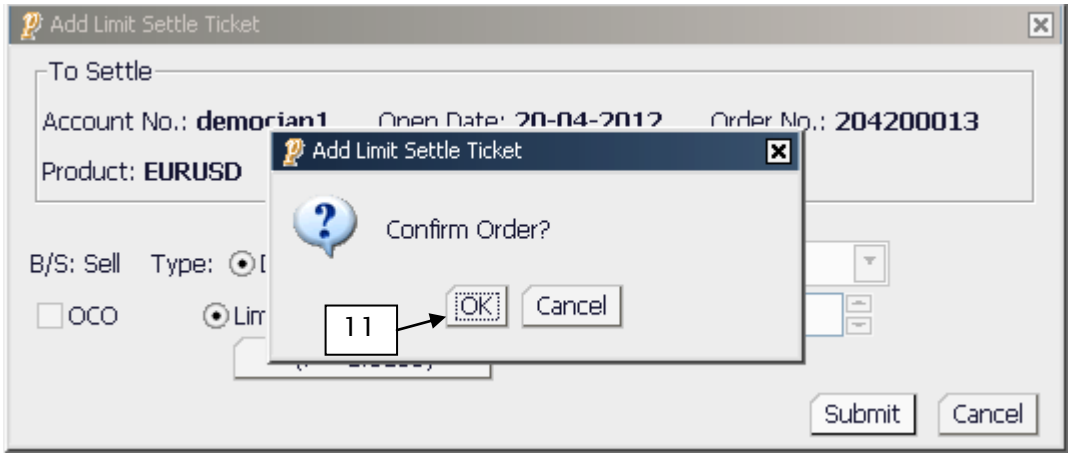

Figure 117

11. Click the "OK" button to confirm the limit settle order.

Figure 118

12. Click the “Close” button to close the reply dialog box.

The second method is adding the ticket from the “Open Positions” panel.

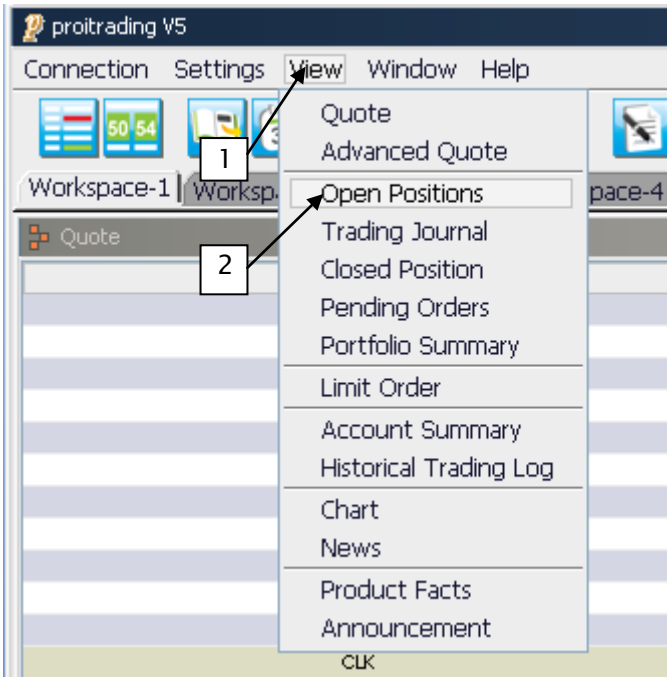

Figure 119

1. Select “View” from the Menu Bar.
2. Click “Open Positions”.

Figure 120

3. Click the “Add” button to open the Add Limit Settle Ticket.

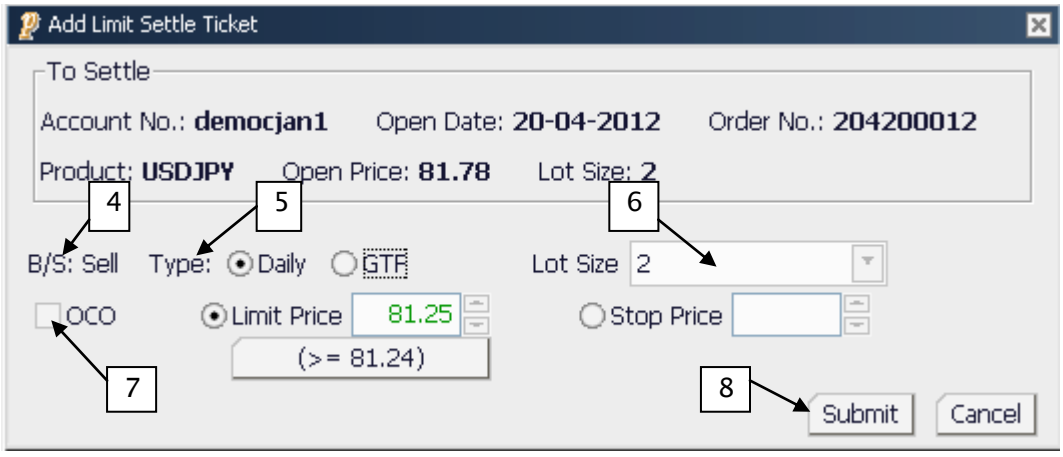

Figure 121

4. The Buy/Sell sides of the limit settle ticket.
5. Select the limit order type between daily and GTF by checking the corresponding radio box. (please refer to section 5.1 for the details of Daily/GTF)
6. Select the limit settle size in the drop down menu.
7. Choose the Limit order type OCO/Limit Price/Stop Price. (please refer to section 5.2 for more details)
8. Click the "Submit" button to continue.

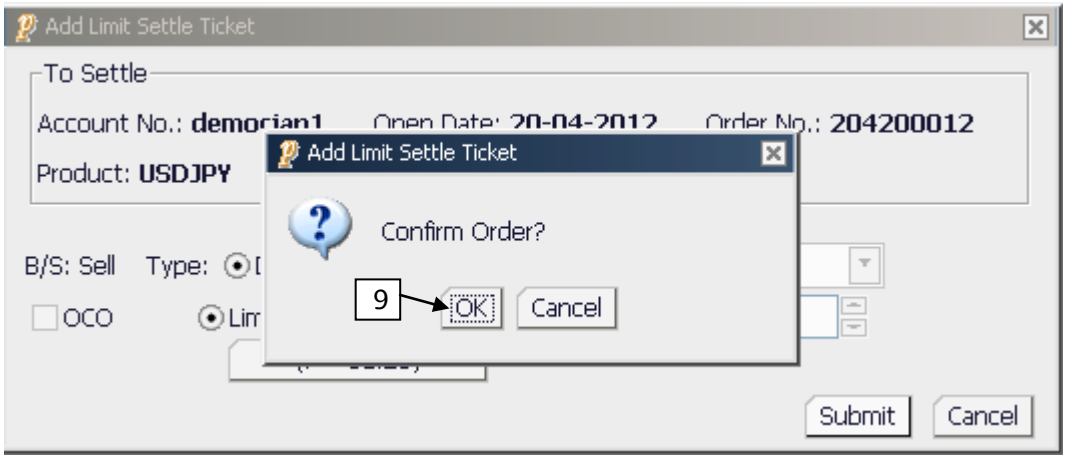

Figure 122

9. Click the "OK" button to confirm the limit settle order.

Figure 123

10. Click the “Close” button to close the reply dialog box.

Section 8.2. Amend Limit Settle ticket

The Limit Settle Order can be modified by clicking the “Amend” button on the Limit Settle panel. The user can change the input parameters of the specified order such as Daily/GTF, lot size, OCO/Limit Price/Stop Price in the Amend Limit Settle ticket.

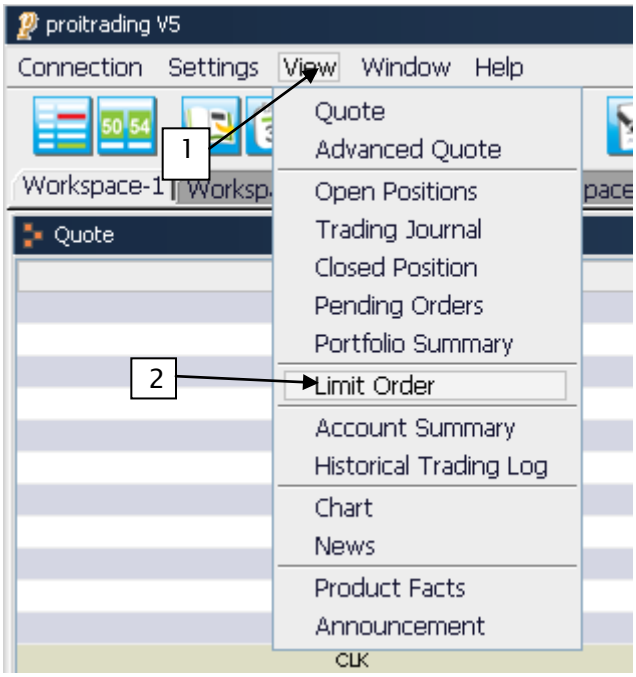

Figure 124

1. Select “View” from the Menu Bar.
2. Select “Limit Order” and system will pop up a new panel as follow.

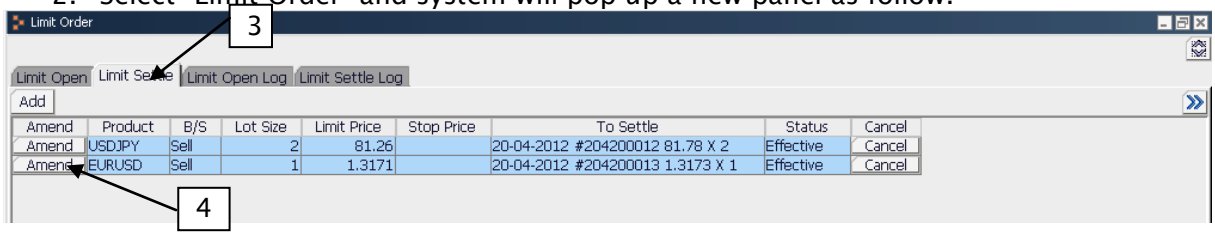

Figure 125

3. Select “Limit Settle” on the list.
4. Click the “Amend” button to open the Amend Limit Settle Ticket and amend a limit settle on a particular outstanding position.

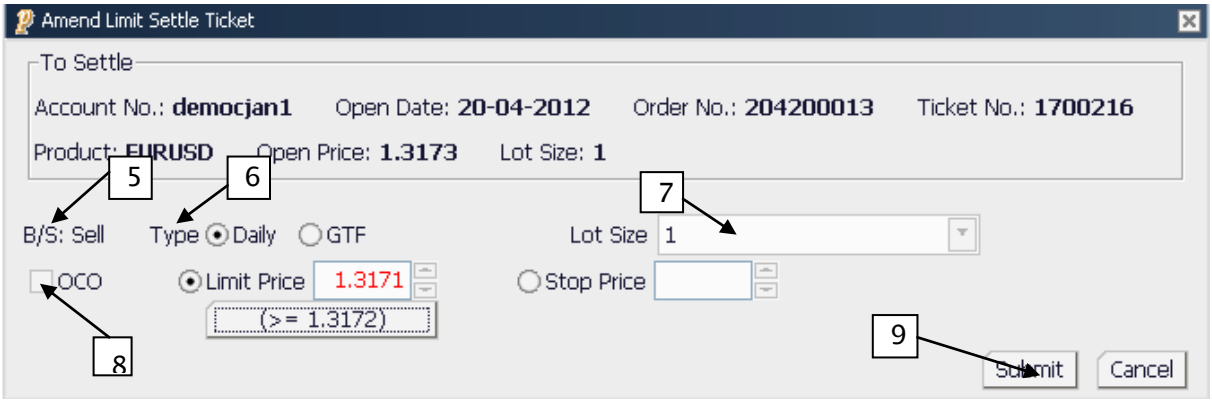

Figure 126

5. The Buy/Sell sides of the limit settle ticket.
6. Amend the limit order type between daily and GTF by checking the corresponding radio box. (please refer to section 5.1for the details of Daily/GTF)
7. Amend the limit settle size.
8. Amend the Limit order type OCO/Limit Price/Stop Price. (please refer to section 5.2 for more details)
9. Click the "Submit" button to continue.

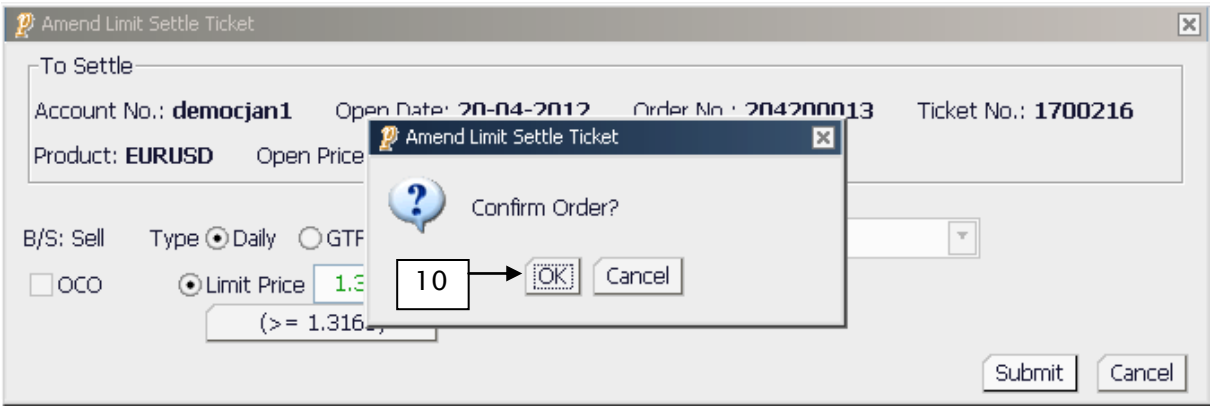

Figure 127

10. Click the "OK" button to confirm the amendment.

Figure 128

11. Click the "Close" button to close the reply dialog.

Section 8.3. Cancel Limit Settle ticket

The Limit Settle Order can be cancelled by clicking the “Cancel” button on the Limit Settle panel. The Cancel Limit Settle Reply will appear to indicate the order cancellation is completed on the system successfully.

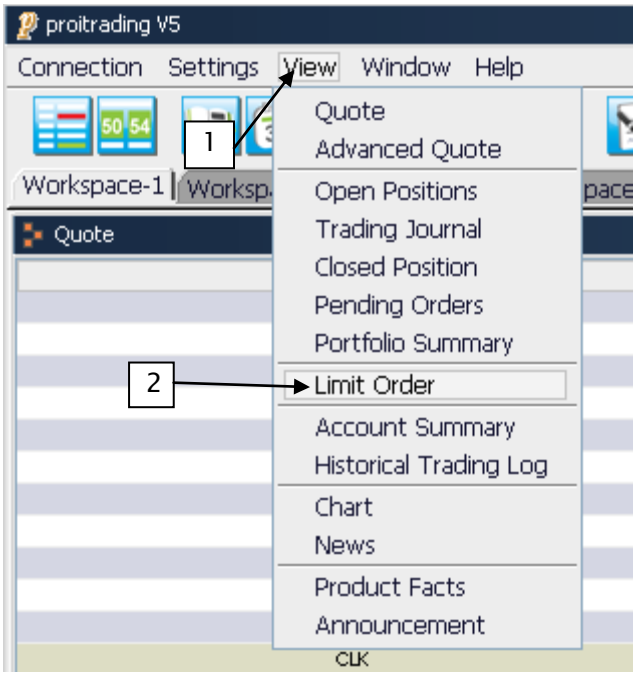

Figure 129

4. Select “Limit Order”, then system will pop up a new panel as follow.

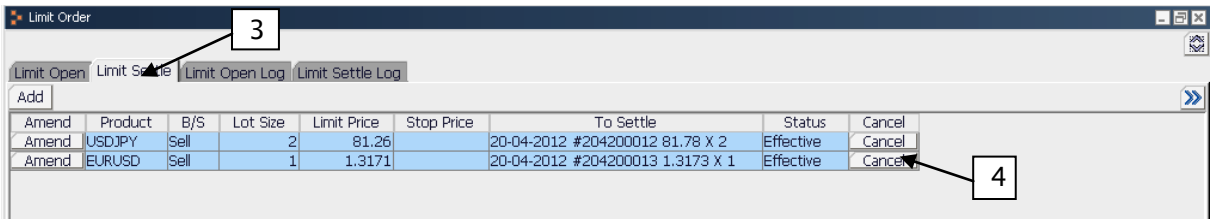

Figure 130

3. Select “Limit Settle” on the list.
4. Click the “Cancel” button to cancel a particular limit settle ticket. The following dialog box will pop up.

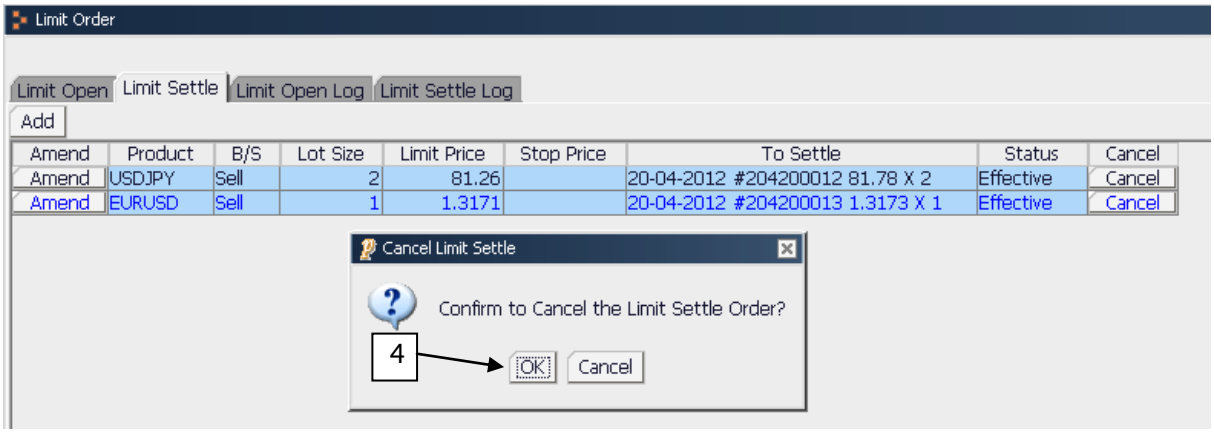

Figure 131

4. Click the “OK” button to confirm the cancellation.

Figure 132

5. Click the “Close” button to close the reply dialog box.

Section 9. Real-time Chart

The real-time chart shows movement of the current price. The menu on the top allows you to choose currency pair, chart type and scale. Multiple technical indicators can be added to the chart. When you move the mouse pointer over the chart, a vertical and a horizontal line will appear on the chart. The corresponding values for the vertical line such as Trade Date, Trade Time, High Bid, Low Bid, Open Price and Close Price are display automatically across the top. The corresponding price value for the horizontal line is displayed on the y-axis on the right of the chart.

You can open more than one Real-time Chart panel for multiple viewing on other currencies. Details can be found on section 2.4.

Section 9.1. Chart Currency

Simply select the desired currency pair in the menu viewing on the chart.

Figure 133

1. Select “Product” on the list viewing on the chart.
2. Print the current chart.
3. Save the current chart.
4. Copy the current chart to clipboard.
5. Choose the desired currency to be displayed on the chart.

Section 9.2. Chart Type

There are total of 3 different chart types to choose from:

Figure 134

1. Line Chart.
2. OHLC Bar Chart.
3. Candle Stick (As shown on Figure 128).

Section 9.3. Time Scale

Available time scales include tick chart, 1 Minute, 5 Minutes, 15 Minutes, 30 Minutes, Daily and Weekly charts. Available points range is from 100 to 2000 points. By default 60 minute, 100 points chart is selected. User can obtain a more precise view on the chart data if they choose smaller time scale like Tick or one minute, however more data can be displayed on the chart if they choose a larger points scale such as 1500 points or 2000 points. The scale on both the x-axis and y-axis is therefore determined by the selected time and point scales.

Figure 135

For example, 60 minutes 100 points chart is a chart which shows 100 points. The data is collected every 60 minutes. The following is a 60 minutes 100 points chart.

For example, 60 minutes 1000 points chart is a chart which shows 1000 points. The data is collected every 60 minutes. The following is a 60 minutes 1000 points chart.

Figure 137

Section 9.4. Studies

To select a technical analysis (TA) indicator, simply click on the indicator in the menu. To delete any indicator from the chart, simply click on Delete, a pop up dialog will be available for selecting the indicator to be deleted. You can also click on Delete All to remove all indicators.

Figure 138

For example, user is going to add the Technical Analysis Average True Range (ATR). The following dialog box will pop up and ask for the interval and color representing ATR in the chart. Click “OK” to add the TA.

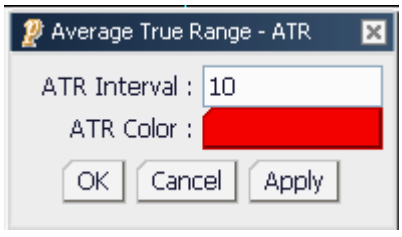

Figure 139

Figure 140

Second, user adds the Technical Analysis MACD, the following dialog box will pop up and ask for the interval and color representing MACD in the chart. Click “OK” to add the TA.

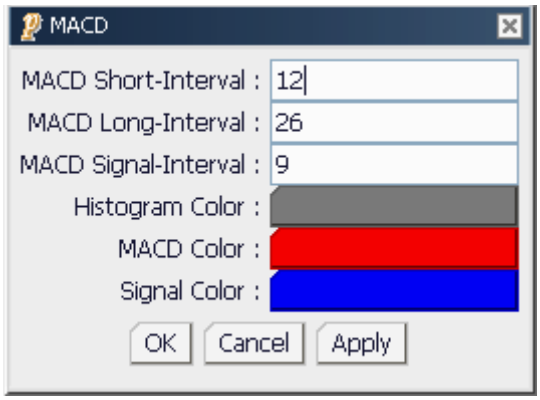

Figure 141

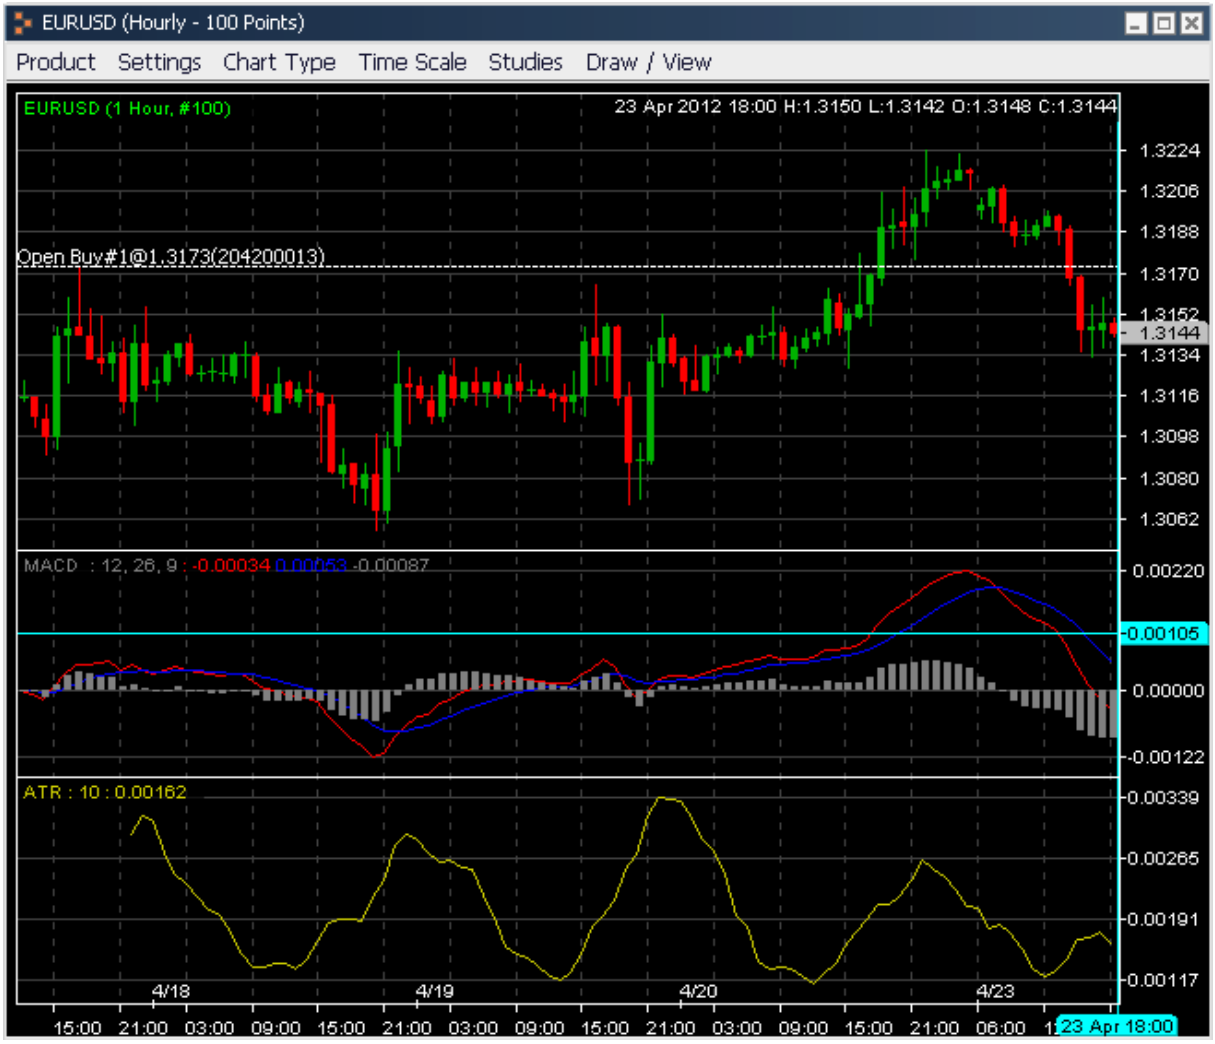

Figure 142

User can add at most 2 Technical Analysis to the chart. (Please noted that user can add various line on the chart with particular TA like Moving Average)

On the other hand, user can delete the TA that was added to the chart. If user clicks the "Delete All Studies" in the "Studies" menu, all TA will be deleted. If user clicks "Delete Study", the pop up dialog below will appear and user can choose which the TA he or she wants to delete.

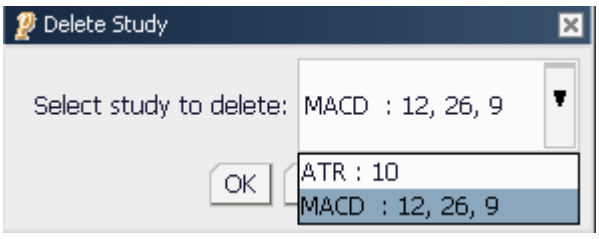

Figure 143

Choose the TA to be deleted in the drop down menu and then click "OK".

Section 9.5. Draw/View

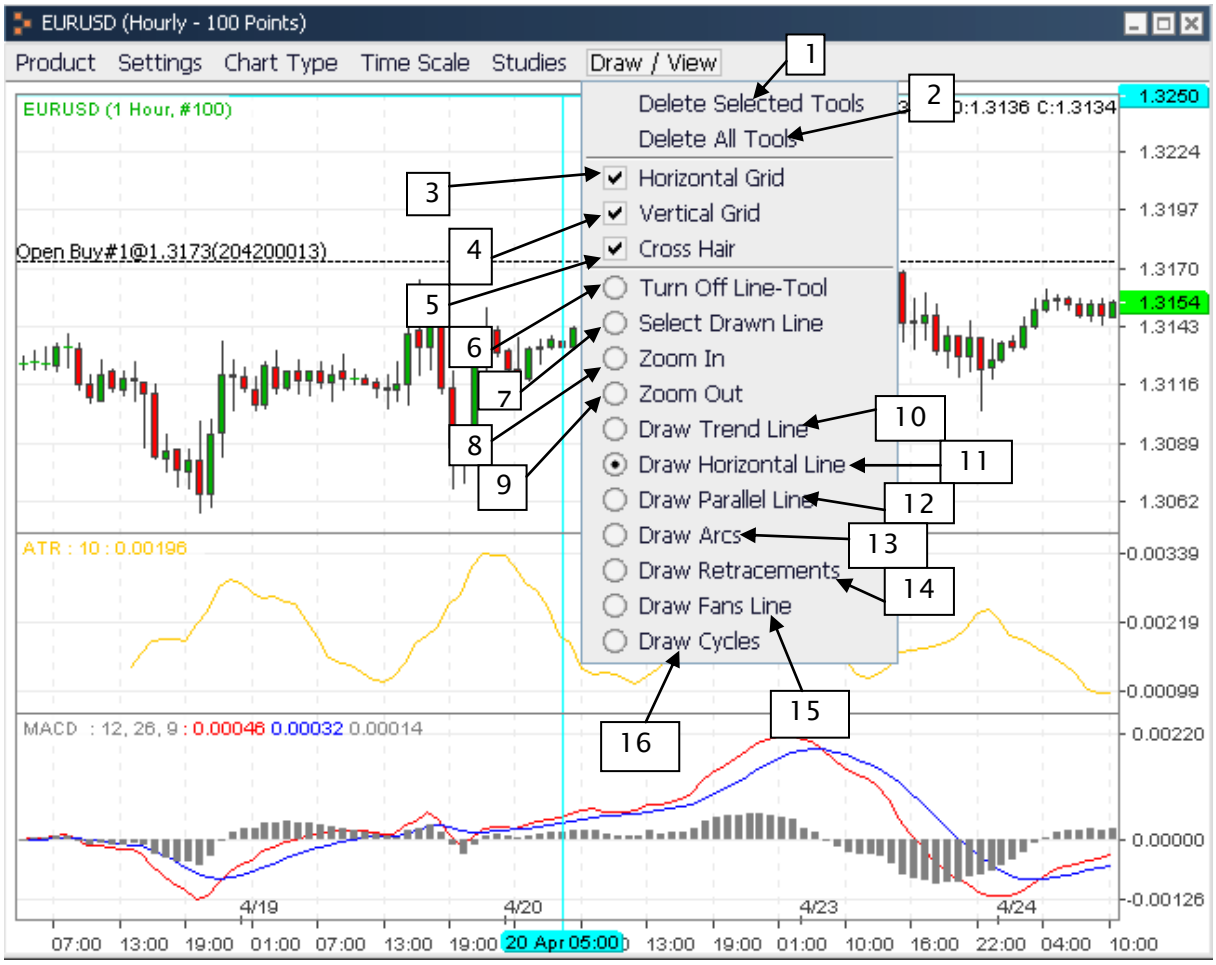

Figure 144

1. “Delete Selected Tool”, User can remove a particular tool applied on the chart.
2. “Delete All Tools”, User can delete all applied tools on the chart.

3. “Horizontal Grid”, horizontal grid line will be displayed.
4. “Vertical Grid”, vertical grid line will be displayed.
5. “Cross Hair”, cross hair line will add to the chart.
6. “Turn Off Line-Tool”, select this radio button to turn off the chosen tool from No.8 to No.16.
7. “Select Drawn Line”, select this function then click on any line-tools drawn on the chart to edit it.
8. “Zoom In”, user can zoom in on the chart.
9. “Zoom Out”, user can zoom out on the chart.
10. “Draw Trend Line”, you can draw trend lines on the chart area, the lines are in grey color.
11. “Draw Horizontal Line”, once selected and clicked on the chart area, a dialog will pop up as shown in Figure 150 below.
12. “Draw Parallel Line”, select to draw parallel lines on the chart.
13. “Draw Arcs”, user can draw arcs on the chart.
14. “Draw Retracements”, user can draw retracements on the chart.
15. “Draw Fans Line”, user can draw fans line on the chart.
16. “Draw Cycles”, user can draw cycles on the chart.

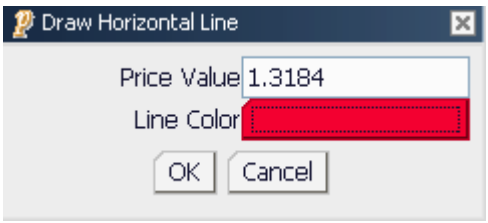

Figure 145

User can choose the “Price Value” and “Color” of the horizontal line and then click “OK”, the line will be drawn on the chart as shown below.

Section 9.6. Zooming

Figure 147

First, choose “Zoom In” in the Draw / View Chart menu.

Figure 148

Click and hold the left mouse button on the chart where you want your zoom to start, and then drag over the chart area where you want to zoom and release the left mouse button.

Figure 149

The selected area is zoomed in.

To zoom out, select “Zoom Out” in the Draw / View Chart menu to zoom out.

Section 9.7. Open / Settle by chart

Apart from the steps mentioned in Section 6/ Section 8 for placing market/ limit open, and in Section 7/ Section 9 for placing market/ limit settle, it is also possible for the user to perform these functions from the chart by right-clicking the mouse button on the chart.

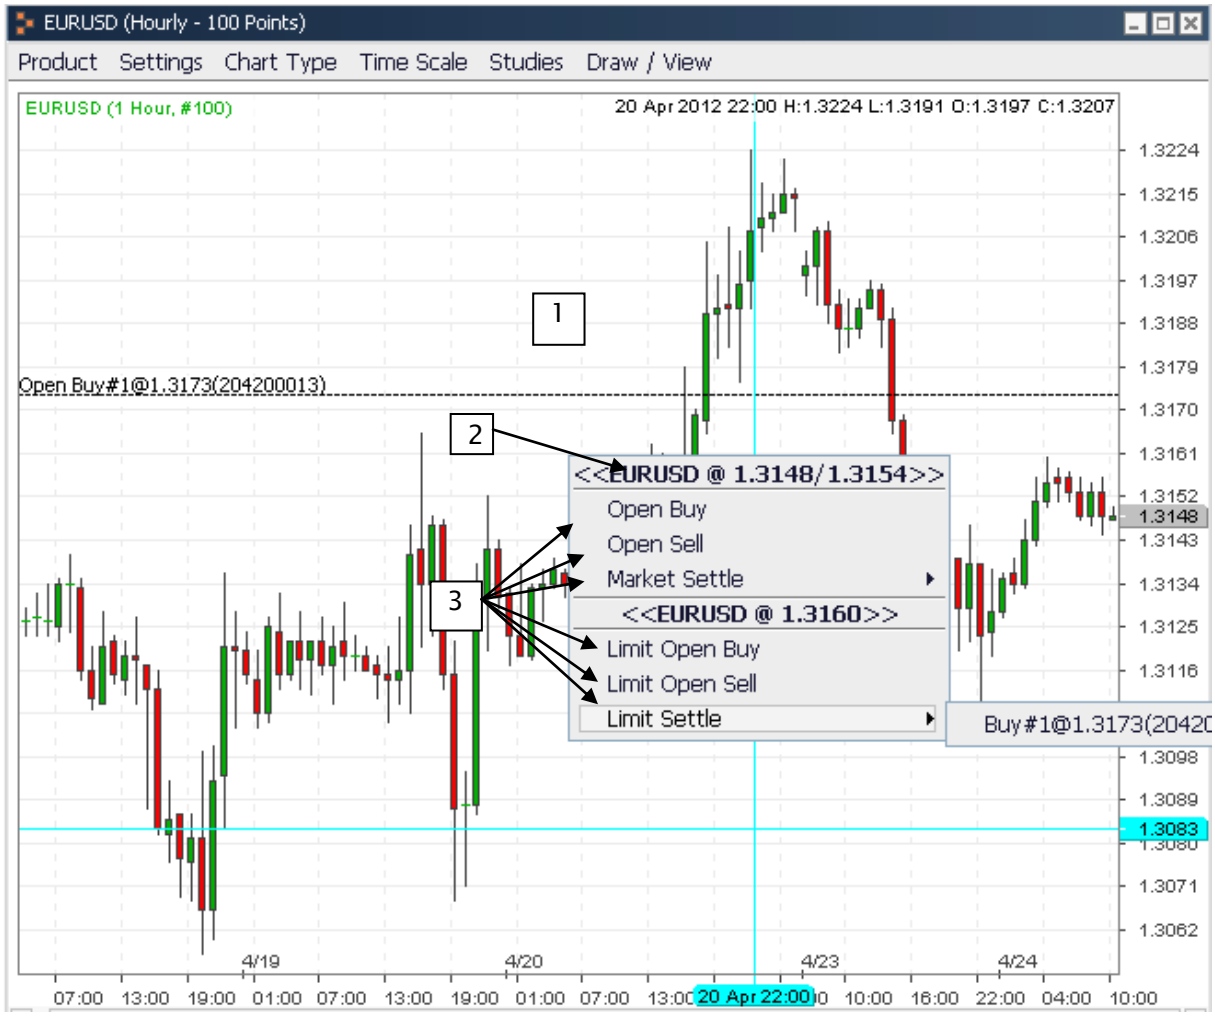

Figure 150

1. Simply right click on the chart.
2. Check and ensure it is the right chart for the product that you are interested.
3. Click on the required function you wish to perform.

* Please note that both Market Settle and Limit Settle button will not be active on the menu unless there are open position(s) on that product in the account.

Once a function is selected, the corresponding forms or tickets for that function will be shown. For further information, please refer to the relevant sections in this menu.

Section 10. Account

Section 10.1. Change Password

Users are encouraged to change his / her password regularly and to use hard-to-guess passwords (i.e. mixture of letters and digits) to increase the password security.

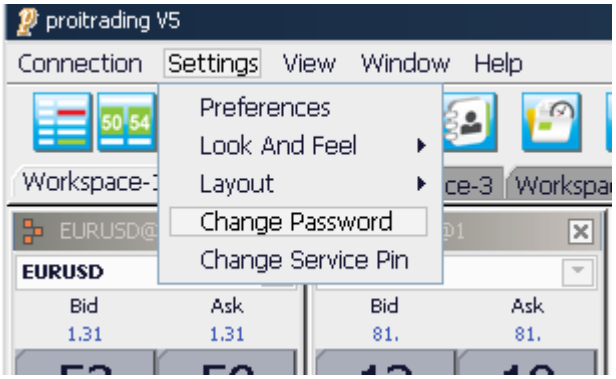

Figure 151

Select “Settings” then click on “Change Password”.

The follow dialog box will pop up:

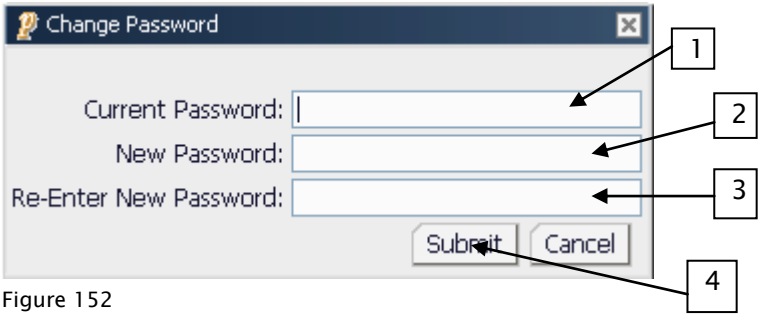

Figure 152

1. Enter your current password.
2. Enter new password.
3. Confirm the new password.
4. Click the “Submit” button to continue.

Figure 153

5. Click the “Close” button to close the dialog box after the password is changed successfully.

Section 10.2. Account Summary

The user can review his / her current portfolio and account information in the “Account Summary” tab under View on the Menu Bar.

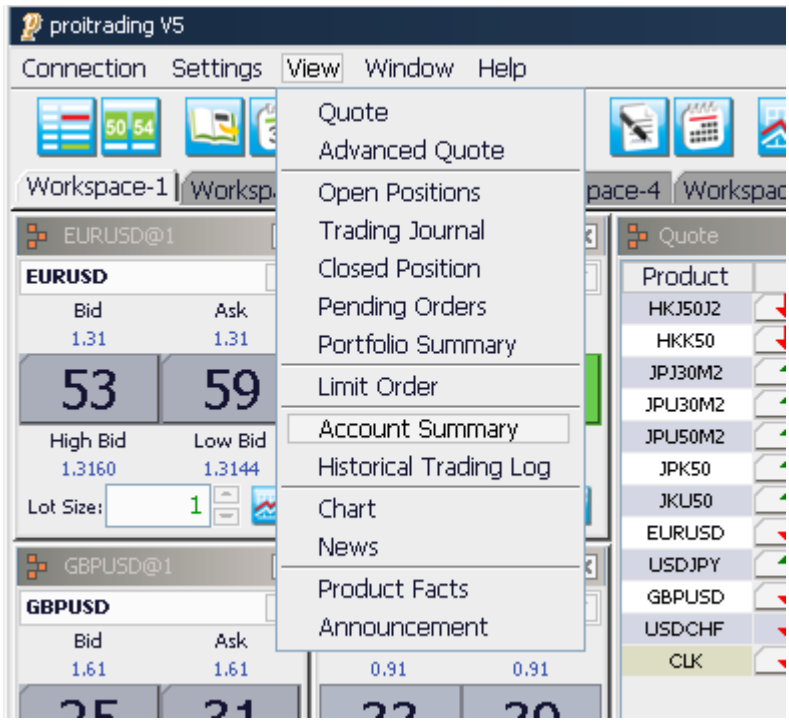

Figure 154

1. Select “View” from the Menu Bar.
2. Select “Account Summary”, then system will pop up a new panel as follow.

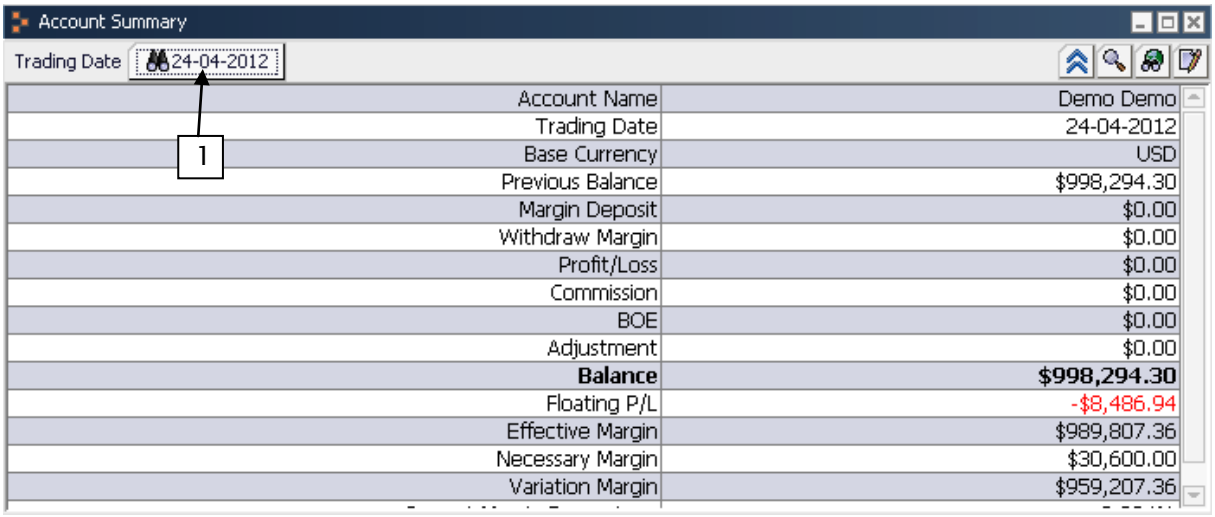

Figure 155

1. Click the "Server Trading Date" box to activate the Calendar dialog.

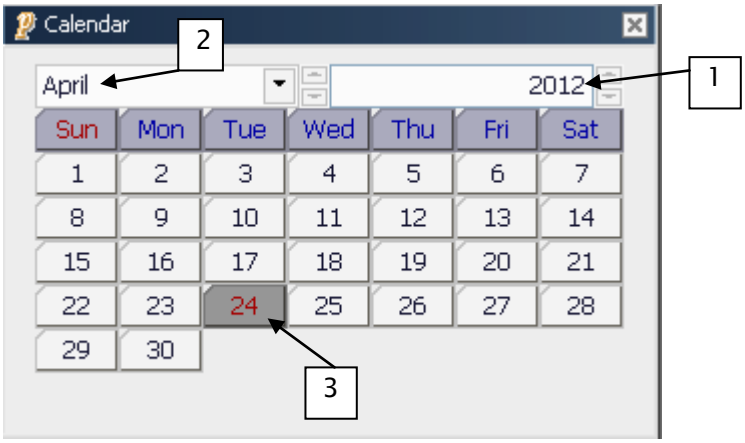

Figure 156

2. Choose the year.
3. Choose the month.
4. Choose the date.

Once the date information is selected, the account summary of that date will be shown on the Account Summary panel.

Section 10.2.1. Show Statement

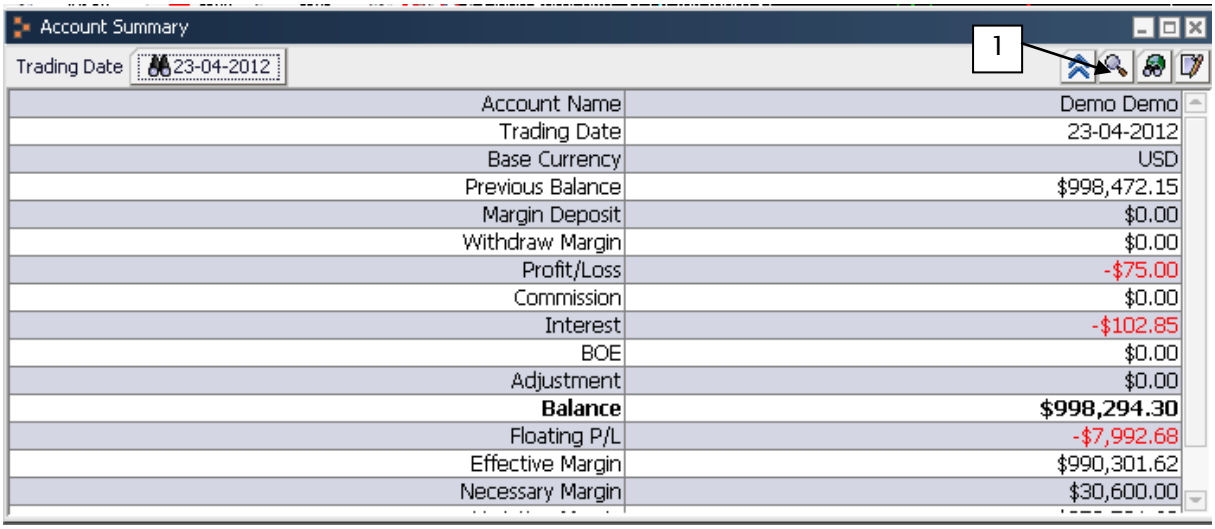

Figure 157

1. Click the "Show Statement" icon to display the account statement of the specified trading date.
